**DRYRight™**

Fiber Glass Insulation

EXCLUSIVE!

## Energy Efficient Insulation with Moisture Control

Moisture that becomes trapped in wall cavities can lead to mold growth and related problems – including structural damage, callbacks and liability issues. CertainTeed's DryRight insulation helps reduce the presence of one of the key components for mold and mildew growth – moisture – by allowing excess moisture in wall cavities to escape.

DryRight, available for both residential and commercial applications, utilizes a unique technology that helps to control moisture. When installed properly, DryRight helps wall cavities to stay dry and mold-free – helping you to avoid unhappy customers.

Don't let this happen to you.  
DryRight can help reduce the risk of  
moisture damage and expensive repairs.

## Moisture Control Through Innovative MemBrain® Technology

DryRight is insulation faced with MemBrain®, the smart Vapor Retarder and Air Barrier Film. MemBrain changes its ability to resist the flow of water vapor depending on the conditions within the wall cavity. This innovative facing allows water vapor to pass through when relative humidity is high, either from seasonal changes or moisture intrusion. During normal conditions, MemBrain works like a traditional vapor retarder to block the passage of moisture and reducing the likelihood of condensation on cold surfaces within the construction cavity.

### DryRight Protects...

*During the heating season.*

*When the relative humidity in insulated cavities is low, MemBrain works as a vapor retarder.*

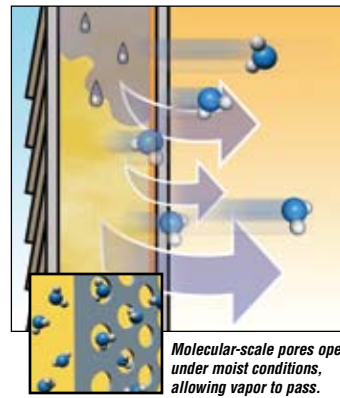

*Molecular-scale pores close under dry conditions, blocking vapor transmission.*

### and Breathes.

*During the cooling season.*

*When the relative humidity in insulated cavities is high, MemBrain changes its permeance to increase the system's drying potential.*

*Molecular-scale pores open under moist conditions, allowing vapor to pass.*

## Now Available in More Sizes and R-Values.

Get DryRight for almost any standard application. Residential and commercial widths and R-values up to R-38 are available. Don't hesitate to contact us for non-standard sizes and special orders.

### Easy to Install

DryRight is designed to friction fit between wall studs and is also available with tabs for ceiling and floor joists for fast, easy installation.

### Long-Term Peace of Mind

Although DryRight costs a little more than conventional insulation, it will pay for itself through greater customer satisfaction, fewer callbacks, and long-term peace of mind.

### GREENGUARD® Certified

CertainTeed's DryRight fiber glass building insulation is GREENGUARD® Children & Schools certified.

Our products have been tested for emissions of formaldehyde, VOCs, respirable particles and other pollutants using the strongest environmental protocols.
