

CertainTeed Sustainable Insulation®

FTC Fact Sheet

Please read this before you buy.

What you should know about R-Values

The chart shows the R-Value of CertainTeed fiberglass batt, blanket and roll insulation available in the United States. The “R” designation means resistance to heat flow. The higher the R-Value, the greater the insulating power. Compare insulation R-Values before you buy. There are other factors to consider. The amount of insulation you need depends mainly on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, fuel use patterns and family size. If you buy too much insulation, it will cost you more than what you’ll save on fuel. To get the marked R-Value, it is essential that the insulation be installed properly.
