Quality made certain. Satisfaction guaranteed.™

Blow-In-Blanket® System with InsulSafe® SP Fiber Glass Insulation.

THE BEST SIDEWALL INSULATION SYSTEM.

Protect your homes with the Blow-In-Blanket System (BIBS®) featuring InsulSafe SP from CertainTeed. With its seamless installation, BIBS with InsulSafe SP provides outstanding thermal efficiency which can pay dividends throughout the life of a home.

BIBS is a patented process in which InsulSafe SP is blown into cavities behind netting. The process requires installation techniques designed specifically for BIBS applications.

THERMALLY EFFICIENT AND COST-EFFECTIVE.

The most R's per inch. BIBS with InsulSafe SP provides the highest R-Value possible in typical sidewall applications. When installed at recommended density levels, it yields an R-15 in 2" x 4" construction and an R-23 in 2" x 6" construction.

A CUSTOM-FIT BLANKET.

What separates BIBS with InsulSafe SP from other insulation systems is its custom-fit seamless thermal blanket and outstanding thermal performance in irregular-shaped cavities and around obstructions.

FILLS VOIDS.

Tests show that even a small gap in an insulated cavity can cause a substantial increase in heating or cooling costs. BIBS with InsulSafe SP makes it easier for installers to provide a superior insulation job with no voids around wires, electrical boxes and pipes. And odd-sized framing assemblies are no problem. With InsulSafe SP, there's no

cutting or fitting. The absence of voids means you're assured of full R-Value for a superior finished job and exceptional thermal efficiency.

BIBS with InsulSafe SP completely surrounds electrical boxes to help prevent costly drafts and cold spots.

BIBS with InsulSafe SP provides a continuous thermal barrier around water pipes, and delivers outstanding acoustic control.

EXCELLENT SOUND CONTROL.

By filling all voids and gaps, BIBS with InsulSafe SP significantly reduces unwanted sounds from appliances, televisions, teenagers, stereos and ventilation systems. And installing it around pipes and plumbing fixtures will help decrease the noise common with running water. Ideal for master bedroom suites, bathrooms, in-home offices and entertainment rooms. For more on sound control, visit www.mysoundchek.com.

WON'T SETTLE.

BIBS with InsulSafe SP will not settle or separate. That means the insulation will maintain its thermal efficiency for the life of the home.

ENVIRONMENTALLY SUSTAINABLE.

BIBS with InsulSafe SP is manufactured by CertainTeed, a company committed to sustainable building practices and a member of the United States Green Building Council (USGBC). The product is

manufactured with no formaldehyde and is GREENGUARD® Certified for superior indoor air quality.

VERSATILE AND DEPENDABLE.

BIBS with InsulSafe SP is the right choice for these applications:

- New construction
- Remodeling projects
- Attics, sidewalls and floors
- Metal framing
- Sound control

With a seamless installation and custom fit around cavity obstructions, builders can now provide homeowners an exceptional level of thermal comfort by installing BIBS/InsulSafe SP.

InsulSafe SP Advantages.

- THERMALLY EFFICIENT
- COST-EFFECTIVE
- EXCELLENT SOUND CONTROL
- WON'T SETTLE
- ENVIRONMENTALLY SUSTAINABLE
- GREENGUARD CERTIFIED
- WON'T ABSORB MOISTURE
- NONCOMBUSTIBLE
- NONCORROSIVE
- LASTS FOR THE LIFE OF A HOME
- MEETS ALL NATIONAL AND LOCAL BUILDING STANDARDS
- LIMITED LIFETIME WARRANTY

Getting comfortable with CertainTeed.

For over 100 years, CertainTeed has been the recognized performance brand among building professionals. With a wide selection of insulation products to fit your homes from the basement up to the attic, you can find comfort in knowing all your insulation needs will be met.
