

Introducing InsulSafe® SP Fiber Glass Blowing Insulation.

With up to 20% better coverage, the answer to better productivity is in the bag.

The technology of InsulSafe SP is advanced, but the idea is simple. The more effective your blowing insulation is in delivering the desired R-Value, the more attic area you can cover with each bag in less time. With fewer bags to work with, you can reach your target R-Values faster, keeping you on schedule. And creating value throughout the construction process. InsulSafe SP blows in quickly and cleanly in uninsulated attics and over current attic insulation. And because of its superior engineering, it fills every nook and cranny to provide complete coverage for lasting comfort and energy savings.

- **BETTER COVERAGE**

Engineered to provide up to 20% better coverage.

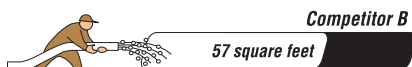

InsulSafe SP

67 square feet

Competitor A

63 square feet

Competitor B

57 square feet

- **BETTER PRODUCTIVITY**

Improved coverage means faster installation to keep you on schedule. Installs easily using a wide range of blowing machines and settings.

- **THERMALLY EFFICIENT**

Provides the same R-Value with less bags.

- **WILL NOT SETTLE**

InsulSafe SP ensures lasting performance throughout its lifespan.

- **ENVIRONMENTALLY SUSTAINABLE**

Lasts for the life of a home which improves energy efficiency and reduces energy consumption.

- **GREENGUARD® CERTIFIED**

InsulSafe SP is certified for low emissions of potential indoor air pollutants by the GREENGUARD Environmental Institute.

- **WARRANTY**

Backed by a limited lifetime warranty against manufacturing defects.
