GlasROC[®] ROOF BOARD

A weather-resistive glass mat gypsum cover board for use in single-ply mechanically attached systems

GlasROC Roof Board Protection

Specially-formulated water-resistant core

Reinforcing glass mats fully embedded beneath a polymer-modified layer of gypsum

- Superior resistance to damage from foot traffic and hail
- Improved physical performance compared to perlite insulation and fiber board
- A superior water-resistant surface that allows water vapor permeance
- Excellent fire-resistance properties and numerous fire-rated designs
- Mold-resistance
- Conformity to design and code requirements
- A lightweight cover board that cuts like regular gypsum board and is easy to handle and install—with minimal skin irritation due to fully embedded glass mats

CertainTeed
SAINT-GOBAIN

High Performance Roof Board

GlasRoc® Roof Board is suited for use in mechanically attached low-slope commercial roofing systems.

GlasRoc Roof Board is a paperless mold- and moisture-resistant gypsum cover board. The unique technology behind GlasRoc Roof Board combines reinforcing glass mats fully embedded into a water-resistant gypsum core and positioned beneath a paperless polymer-modified gypsum surface. It is an enhanced version of the patented Embedded Glass Reinforced Gypsum™ technology developed and used by CertainTeed and its affiliates for 20 years. Several patents have been awarded with other patents pending.

buildingresponsibly™

CertainTeed respects the environment through the responsible development of sustainable building products and systems.

The building industry continues to look for ways to reduce impact on the environment while meeting customer demand for products that deliver beauty, comfort and performance.

CertainTeed strives to be the preferred supplier for innovative, sustainable building products and systems.
