

While WeatherBoards™ FiberCement siding remains a remarkably low maintenance product, the suggestions and recommendations below should be followed to achieve long term satisfaction.

PERIODIC MAINTENANCE AND CARE

The siding should be inspected periodically with the following routine maintenance performed as necessary:

- Renail any loose siding.
- Cut back any trees or shrubs that rub against the siding.
- Replace any caulking that has hardened, cracked or lost its seal.
- Correct the drainage in any spots where water is retained in contact with the siding. Long term contact with water may result in discoloration.
- Avoid regularly wetting the siding with lawn sprinklers since water in many locales contains rust or minerals which may discolor the siding's surface, shorten the life of the paint job and encourage the growth of mildew and fungus.

Note: If product has been finished/ painted in the field, please refer to your paint manufacturer's recommendations for care and maintenance.

If product has been pre-finished with CertainTeed's ColorMax™ Finish refer to the care and maintenance document for CertainTeed ColorMax™.

If product has been pre-finished with CertainTeed Premium Stains, refer to the Masons Select Stain Finish FAQ document.
