

CertainTeed
WeatherBoards™
Fiber Cement Siding

**The Beauty of Cedar Shakes
Without the Drawbacks of Wood.**

From its authentic, wood-grain texture and earth-friendly formulation to its non-combustible fire rating and long-lasting durability, CertainTeed WeatherBoards™ Fiber Cement Siding is a choice you'll feel good about now—and for years to come.

You'll love the traditional appearance of cedar shakes and shingles with the added advantage of much less upkeep than is required by wood siding.

Random Square Straight Edge

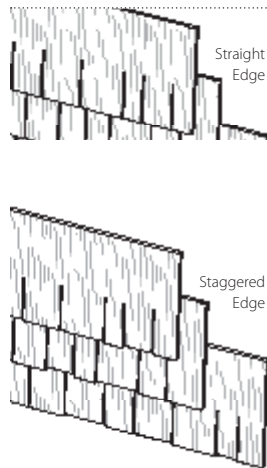

Perfection Shingles

Individual Shakes Staggered Edge

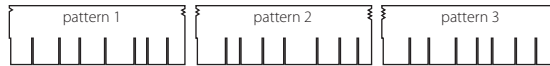

CertainTeed WeatherBoards™ Fiber Cement Siding

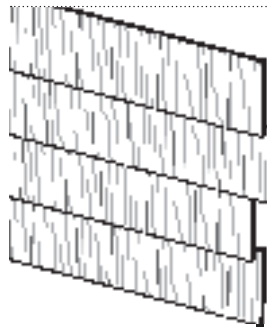

Random Squares

WeatherBoards™ Random Squares in staggered or straight styles provide a traditional random shake effect and eliminate all the guess work associated with conventional shake application. Our easy 1, 2, 3 panel system installs easily, ensures that keyways are not lined up and reduces scrap. Because it goes up quickly, it's a cost-efficient solution for your job.

Easy 1, 2, 3 panel system

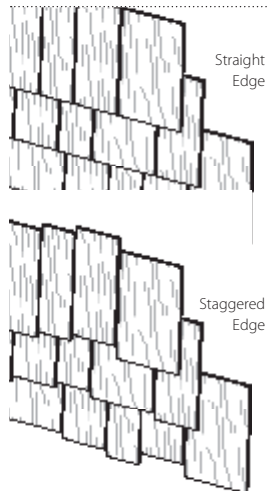

Install the three panels in the order specified in the installation instructions for a traditional random appearance

Perfection Shingles

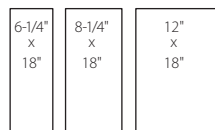

If you are looking for a more economical option that simulates a shake look, WeatherBoards™ Perfection Shingles is a great alternative. Installation couldn't be easier because it comes in 12' boards that install just like lap siding. You can achieve a more random appearance simply by reversing alternating courses during installation.

Individual Shakes

For those of you who prefer actual cedar shake, WeatherBoards™ Individual Shakes is your answer. It provides the appearance of real cedar shake while offering the same advantages of our other fiber cement products. Each kit includes three individual sizes that are easy to install (no cutting required except at edges) while allowing you the flexibility to achieve the exact look you want.
