Section 2 - Hazards Identification

Emergency Overview

Prevention Avoid breathing dust, fume, gas, mist, vapours and/or spray.

Storage/Disposal Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Under normal conditions of use the products listed in this MSDS are not expected to pose a physical hazard or health risk to humans. These products do not contain any form of asbestos materials. The component exposure limits and other information in this document are provided for circumstances such as heating (above 250°F), burning, cutting, sanding and/or grinding when there is potential for exposure to these components. If heated, this product may cause temporary irritation to the upper respiratory system. Avoid inhalation as temporary irritation may occur. Mechanical irritation may occur. Wear appropriate personal protective equipment as described in Section 8.

- Physical Form** ▪ Solid
- Color** ▪ Black
- Odor** ▪ Mild petroleum odor.
- OSHA** ▪ None
- WHMIS** ▪ None

GHS

- None

Route Of Entry

- Inhalation, Skin, Eye

Medical Conditions Aggravated by Exposure

- Pre-existing lung conditions which may be aggravated if fumes/dusts are inhaled,

Potential Health Effects**Inhalation****Acute (Immediate)**

- Temporary irritation of nose and throat may occur.

Chronic (Delayed)

- This product contains crystalline silica which is listed by IARC as a suspect carcinogen. Silicosis (pulmonary fibrosis or severe lung scarring) may occur if exposed to high levels or repeated encounters with dust. Exposure to airborne particles that exceed the limits listed may cause lung cancer. This product also contains petroleum asphalt. If heated, there is limited evidence that derivatives of asphalt fumes may cause carcinogenic effects in animals. There is inadequate evidence to support that asphalt fumes alone are carcinogenic to humans.

Skin**Acute (Immediate)**

- Mechanical irritation of the skin may occur.

Chronic (Delayed)

- No data available.

Eye**Acute (Immediate)**

- Mechanical irritation of the eyes may occur.

Chronic (Delayed)

- No data available.

Ingestion**Acute (Immediate)**

- Ingestion of this product unlikely.

Chronic (Delayed)

- No data available.

Carcinogenic Effects

- When used under normal conditions, this product is not considered a carcinogen. This product contains petroleum asphalt. Asphalt fumes arise from hot asphalt. Asphalt fumes (CAS # 8052-42-4): In 1985/87, IARC (International Agency for Research on Cancer) concluded the following: (a) Bitumens are not classifiable as to their carcinogenicity to humans (Group 3). (b) Extracts of steam - and air-refined bitumens are possibly carcinogenic to humans (Group 2B). IARC found that evidence for carcinogenicity from animal studies was: inadequate for undiluted air -refined bitumens; limited for steam-refined and cracking residue bitumens; sufficient for extracts of steam-refined and air-refined bitumen. IARC found that human evidence for carcinogenicity of asphalt fumes was inadequate. Studies of roofers indicated an excess of cancers; however, IARC concluded that, since roofers may be exposed also to coal-tar pitches and other materials, "the excess cancer risk cannot be attributed specifically to bitumens." In 1994, a published review of 20 epidemiology studies of asphalt workers and roofers agreed with IARC, that current human evidence is inadequate for the carcinogenicity of asphalt fumes in humans. Trace amounts of polynuclear aromatic hydrocarbons (PAHs) may be present in some asphalts and can be released upon excessive heating, which results in thermal cracking of the asphalt compounds. Some of these PAHs have been identified as having the potential to induce carcinogenic and reproductive health effects. This product contains crystalline silica. IARC Monographs on Evaluation of Carcinogenic Risk of Chemicals to Humans (Monograph 68, 1997) concludes that there is sufficient evidence for the carcinogenicity of crystalline silica to humans, IARC (Group I). Crystalline Silica is classified as a Known Carcinogen according to the NTP.

Carcinogenic Effects			
	CAS	IARC	NTP
Quartz (SiO ₂)	14808-60-7	Group 1-Carcinogenic	Known Human Carcinogen
Asphalt	8052-42-4	Group 2B-Possible Carcinogen	Not established
		Group 3-Not Classifiable	

See Section 12 for Ecological Information.

Under United States Regulations (29 CFR 1910.1200(c) - Hazard Communication Standard), the product(s) listed above are exempt as article(s) under stated normal conditions of use. Under Canadian regulations (Workplace Hazardous Materials Information System (WHMIS) - Hazardous Products Act (HPA), Section 11(1)), these product(s) are exempt and considered manufactured article(s) under stated normal conditions of use. Under United Nations Globally Harmonized System for the Classification and Labeling of Hazardous Chemicals (GHS) this product is exempt from regulation as a manufactured article.

See Section 11 for Toxicological Information.

Section 4 - First Aid Measures

- | | |
|-------------------|---|
| Inhalation | <ul style="list-style-type: none"> Remove to fresh air, apply artificial respiration and/or oxygen if necessary and get medical attention. |
| Skin | <ul style="list-style-type: none"> Remove contaminated clothing and wash exposed skin with soap and water. If irritation develops or persists, seek medical attention. |
| Eye | <ul style="list-style-type: none"> If foreign matter enters eyes, immediately flush with large amounts of water for at least 15 minutes or until irritation subsides. If irritation develops, or persists, seek medical attention. |
| Ingestion | <ul style="list-style-type: none"> Consult a physician if unusual reaction is noted. Product is not intended nor is it likely to be ingested or eaten. |

See Section 2 for Potential Health Effects.

Section 5 - Fire Fighting Measures

- | | |
|---|--|
| Extinguishing Media | <ul style="list-style-type: none"> Use water, foam, CO₂ or dry chemical extinguishers to contain fire. |
| Unsuitable Extinguishing Media | <ul style="list-style-type: none"> No data available. |
| Firefighting Procedures | <ul style="list-style-type: none"> Fire fighters should avoid inhaling any combustion products. |
| Unusual Fire and Explosion Hazards | <ul style="list-style-type: none"> Burning of this product will produce thick black smoke. |
| Hazardous Combustion Products | <ul style="list-style-type: none"> If burned, the materials could release toxic fumes and smoke. Incomplete thermal oxidation can produce hydrogen cyanide, carbon monoxide, carbon dioxide, ammonia, formaldehyde and other low molecular weight hydrocarbons and oxides or sulfur, nitrogen, calcium and magnesium. |

- Protection of Firefighters
 - Firefighters should wear full-face, self contained breathing apparatus and impervious protective clothing to avoid smoke inhalation and lack of oxygen.

Section 6 - Accidental Release Measures

- Personal Precautions
 - Not applicable.
- Emergency Procedures
 - Not applicable.
- Containment/Clean-up Measures
 - Pick up large pieces. Vacuum dust. If sweeping is necessary, use a dust suppressant such as water. These procedures will help to minimize potential exposures. Scoop up material and put into a suitable container for disposal as a non-hazardous waste.

Section 7 - Handling and Storage

- Handling
 - Do not breathe dusts or fumes generated from cutting or heating this material. Keep this product away from heat, sparks, or open flame. Use this product with adequate ventilation. Always wash work clothes separately from other clothing. Wash thoroughly after handling. Use personal protective equipment as described in Section 8.
- Storage
 - Store indoors in a cool, dry, well-ventilated area. Do not handle or store near an open flame, heat or other sources of ignition.
- Special Packaging Materials
 - No data available.
- Incompatible Materials or Ignition Sources
 - This product will react with strong oxidizing agents, reducing agents, strong acids and alkalis.

Section 8 - Exposure Controls/Personal Protection

Personal Protective Equipment

- Pictograms
 - 
- Respiratory
 - Respiratory protection is not normally required. Use a NIOSH approved/certified respiratory when the exposure limits are exceeded. Use a particulate filter respirator for particulate concentrations exceeding the Occupational Exposure Limit.
- Eye/Face
 - Safety glasses with side shields should be worn at a minimum.
- Hands
 - Leather or cotton gloves may be worn to prevent skin contact and irritation.
- Skin/Body
 - Normal work clothing (long sleeved shirts and long pants) is recommended.
- General Industrial Hygiene Considerations
 - Use good industrial hygiene practices in handling this material. Availability of eye wash fountains are recommended.
- Engineering Measures/Controls
 - No special ventilation systems are required under normal conditions of use.

Section 11 - Toxicological Information

Temporary irritation may be observed in the upper respiratory system, eyes, and skin. Inhalation of dusts/fumes from this product may cause scratchy throat, congestion, and slight coughing.

Component Name	Concentration	CAS	Data
Asphalt	35% TO 55%	8052-42-4	Acute Toxicity: orl-rat LD50:>5000 mg/kg; ihl-rat LC50:>94.4 mg/m3; ihl-rat TCLo:100 mg/m3/6H/14W-I; ihl-hmn TDL0:10 mg/m3/5.5Y-I
Quartz (SiO2)	15% TO 35%	14808-60-7	Acute Toxicity: ihl-hmn LCLo:300 ug/m3/10Y-I; ihl-rat TCLo:6.2 mg/m3/6H/6W-I; ihl-rat TCLo:108 mg/m3/6H/3D-I; ihl-rat TCLo:200 mg/kg; Tumorigen/Carcinogen: ihl-rat TCLo:50 mg/m3/6H/71W-I

This product contains crystalline silica. Crystalline silica is considered a carcinogen by IARC as well as NTP. This product contains petroleum asphalt. If heated, there is limited evidence that derivatives of asphalt fumes may cause carcinogenic effects in animals. There is inadequate evidence to support that asphalt fumes alone are carcinogenic to humans.

| Persistence/Degradability | <ul style="list-style-type: none"> No information available for the product. |

Bioaccumulation Potential ▪ No information available for the product.

Mobility in Soil ▪ No information available for the product.

This product has not been tested. Based on information related to all raw materials in the finished product it is not expected to harm ecosystems through its applied use.

Section 13 - Disposal Considerations

Product ▪ This product, as supplied, is not regulated as a hazardous waste by the U.S. Environmental Protection Agency (EPA) under Resource Conservation and Recovery Act (RCRA) regulations. Comply with state and local regulations for disposal. If you are unsure of the regulations, contact your local public health department, or the local office of the EPA. Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.
