# T-Roc<sup>®</sup>

## Rock Solid Performance

The Superior Solution for Insulating and Finishing Poured Concrete Walls

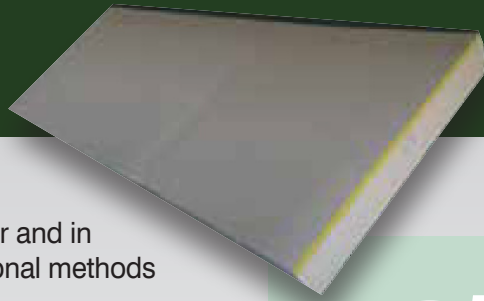

- Composite panels comprised of GlasRoc<sup>®</sup> paperless gypsum boards permanently laminated to high R-value EPS foam
- Installs in concrete wall forms
- Stripped forms reveal a move-in ready, insulated, semi-finished basement!

See reverse side.

SAINT-GOBAIN

# T-Roc®

**Easily Installed**

T-Roc can be installed with far less labor and in a fraction of the time required for traditional methods (stud frame-out, batt insulation, drywall).

**Weather Resistant:** Exterior-grade T-Roc will hold up to the harshest weather conditions before the 1st floor deck is installed and the basement is enclosed.

#### **The Better Basement Insulation Choice:**

The combination of paperless GlasRoc and EPS offers superior moisture resistance and provides no food source for mold to grow, so mold and mildew concerns are minimized.

#### **Finishing:**

An electrical chase with room for three wires runs from the top to the bottom of each T-Roc panel, so electrical installation throughout the basement can be easily accomplished.

Boards can be finished using fiberglass mesh joint reinforcing tape and setting compounds, followed by painting for a beautiful finished look (to suit the homeowner's décor).

#### **Termite Resistant:**

EPS foam is treated with non-toxic \*Perform Guard® for superior termite protection

#### **Meets or Exceeds Code Requirements:**

- Meets IRC 2009 requirements for insulated basement walls
- Exceeds UL 1715, fire test for interior finish material (room corner burn test)
- Meets IBC and IRC requirements for 15-minute thermal barrier protection of foam plastic insulation

\*Registered trademark of AFM Corporation

Since 1904, CertainTeed has been manufacturing high quality, innovative building products, including roofing, insulation, vinyl and fiber cement siding, vinyl fence, railing and deck and pipe. Our name is derived from the slogan "Quality made certain, satisfaction guaranteed," and reflects an unwavering commitment to the building professionals who rely on us. This commitment, and our many years of experience in product design, were applied to the challenge of creating a better foundation footing and drainage system — and Form-A-Drain is the result. Form-A-Drain lineals are made from 100% recycled PVC for conformance with "Green" building construction practices.

**buildingresponsibly™** CertainTeed respects the environment through the responsible development of sustainable building products and systems.

# GlasRoc® BRAND

GlasRoc Sheathing's unique technology combines reinforcing glass mats, fully embedded into a water-resistant gypsum core positioned beneath a paperless polymer-modified gypsum surface, and a protective acrylic coating on the exterior surface. Several patents have been awarded with others pending.

#### **GlasRoc offers:**

- A superior water-resistant surface that does not inhibit water vapor permeance
- Mold resistance
- Five-year limited warranty assuring product performance
- Excellent fire protection
- Enhanced Dimensional Stability... It is dimensionally stable under changes in temperature and relative humidity. To back it up, CertainTeed provides a 12-month exposure limited warranty.
- Mold Resistance... Because it contains no starches or sugars, GlasRoc resists mold growth. When tested in accordance with ASTM D 3272, the product exhibited no evidence of mold or fungal growth after a period of 28 days of exposure, yielding a rating of 10.
- Increased Durability... The product resists delamination because the glass mats are fully embedded into the panel, creating a more durable, dimensionally stable panel.
