# 2011 Limited Warranty Addendum

## For Presidential™ Solaris Effective April 1, 2011

**Please note the following changes for the specified product installed on or after April 1, 2011.**

These changes are also reflected in the 2011 limited warranty posted on the CertainTeed website at [www.certainteed.com](http://www.certainteed.com). If you have any questions please call (800)782-8777.

### TABLE 1 FOUND ON PAGE 2:

Presidential™ Solaris is a “Lifetime A”<sup>\*</sup> product with all applicable warranty coverages and is backed by a 15-year algae resistance warranty.

### LIMITED ALGAE WARRANTY FOUND ON PAGE 4:

Blue-green algae, which is commonly but incorrectly called “fungus,” can create unsightly streaking on shingles. CertainTeed warrants that the Algae-Resistant (AR) version of Presidential Solaris shingles will remain free from blue-green algae growth (but not mold or mildew growth) which adversely affects the overall appearance of said shingle for a period of 15-years.

If during the Algae-Resistant Warranty Period specified in Table 1, the overall appearance of the Algae-Resistant shingles is adversely affected by blue-green algae, CertainTeed will pay the reasonable cost to replace or clean at its option, any affected shingles. In the event of replacement or cleaning, for the remainder of the Algae-Resistant Warranty Period, CertainTeed’s maximum contribution towards subsequent replacement or cleaning will be calculated using the Algae-Resistant Warranty Period specified in Table 1, less a prorated adjustment that reflects the number of months that have elapsed from the start of the Algae-Resistant Warranty Period to the date of reoccurrence.

#### WARNING: FOR LOW-VOLUME RAIN AND SALT FOG AREAS

In areas of low-volume rain (e.g. areas that receive insignificant rainfall during a 90-day period) and/or “salt fog” (e.g. parts of the Southern California coastline), copper released by algae-resistant (AR) granules or shingles can react with aluminum in gutters and cause severe corrosion of the gutters. In such regions, CertainTeed strongly recommends that vinyl or copper gutters, not aluminum gutters, be used with algae-resistant shingles.

**CertainTeed disclaims all liability and responsibility for any damages that may result from the use of its algae-resistant shingle products with copper granules where gutters containing aluminum are used.**

\* The Lifetime Warranty period is only available to individual homeowners. The warranty period for these shingles installed on premises not used by individual homeowners as their residence is limited to 50 years and the SureStart period is 10 years following the installation of the shingles. Roof tear-off and disposal expense, incurred during repair or replacement are covered or reimbursed by this Limited Warranty. Limited Warranty transferees during the SureStart period are limited to a 50-year warranty period (see section titled “Transfers During the SureStart Period” for details).
