You  
know it  
when you  
see it.

It's not just a roof.  
It's a CertainTeed roof.

Quality. Durability. Style. Color.

When you select a roof for your  
home, there's a lot to consider.

That's when a roof becomes more  
than just a roof. The same way a  
home is more than just a house.

You want the best for your home  
and everything in it.

So why guess,  
when you can be **Certain?**

 **certainteed**  
SAINT-GOBAIN

Insist upon the

# Integrity Roof System™

and get the ultimate in roof performance!

## A superior roof is stronger than the sum of its parts

Your roof should do more than shield the elements. It should protect your home, and more importantly, everything you care about.

The Integrity Roof System is designed to provide optimum performance, day after day, year after year. It's a full suite of roofing components engineered to complement each other and create an active defense against whatever gets in your home's way.

After all, the Integrity Roof System is backed by the power of CertainTeed – and better-quality components means you've got a roof system built to protect against even the most extreme conditions.

### 1. Waterproofing Underlayment

Waterproofing shingle underlayment prevents leaks from wind-driven rain and ice dams

### 2. Water-Resistant Underlayment

High-performance underlayment provides a water-resistant layer over the roof deck and a secondary barrier against leaks

### 3. Starter Shingles

Perfect starts every time and designed to work in tandem with the roof shingles above

### 4. Roof Shingles

Choose the best, covered by the strongest warranty in the business

### 5. Roof Ventilation

Engineered for ideal roof ventilation especially when matched with CertainTeed Intake Vents

### 6. Hip & Ridge Caps

Perfect finish for hip and ridge lines, complementing all CertainTeed shingles

# Technology that protects the beauty of your roof and strengthens its performance.

## QuadraBond<sup>®</sup>

### Advanced Layering

CertainTeed's specially formulated adhesive adheres shingle layers at four points, more than any other manufacturer. This superior bond provides greater protection against shingle delamination to maximize performance over the life of the shingle in any climate.

## Certaseal<sup>®</sup>

### Uplift Protection

**Certaseal<sup>®</sup>** is a fast-activating modified asphalt sealant with a 20-year record of proven performance. Designed to seal shingles together upon installation, it protects roofs from wind uplift and shingle blow-off so that homes stay safe and dry. It's also engineered to remain flexible after installation, unlike harder sealants that can dry out and crack over time.

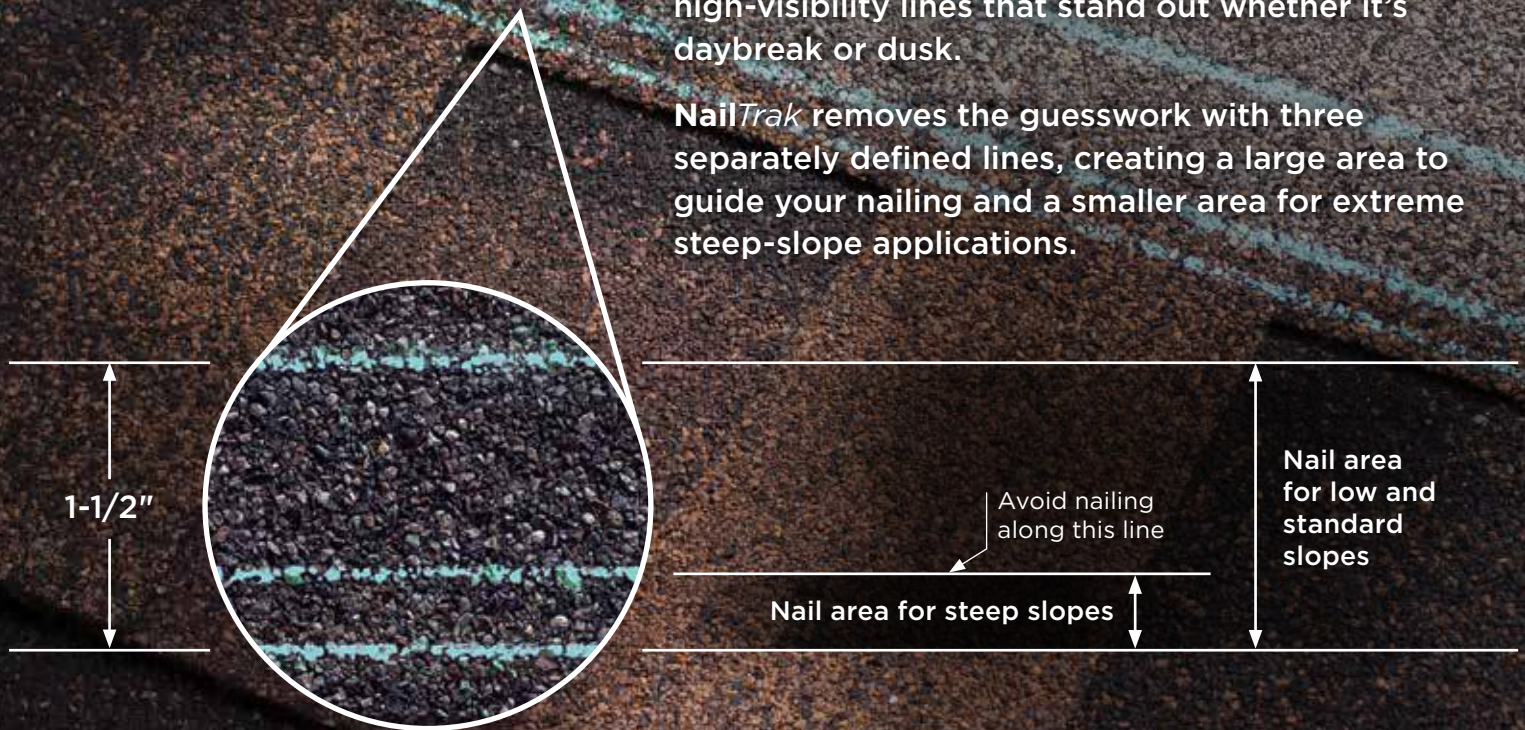

# NailTrak<sup>®</sup>

Fast, Accurate, Visible

The new and improved **NailTrak** nailing line, a feature on CertainTeed designer shingles.

Now **NailTrak** is brighter than ever before, with high-visibility lines that stand out whether it's daybreak or dusk.

**NailTrak** removes the guesswork with three separately defined lines, creating a large area to guide your nailing and a smaller area for extreme steep-slope applications.

## Solaris<sup>®</sup> CoolRoof

Solar Reflectivity

Solaris<sup>®</sup> Cool Roof is a sustainable shingle granule technology that applies energy-saving cool roof performance to CertainTeed's most popular shingle brands. Available in rich and authentic colors, including dark hues and tones, Solaris Cool Roof can lower roof temperatures and allow homeowners to reduce cooling costs without sacrificing beauty, quality, or color.

# Luxury Shingles

Luxury shingles are the highest-quality laminated shingles available, offering a differentiated appearance or functionality that exceeds designer shingles. Apart from offering premium protection for weathering, luxury shingles provide stunning visuals, presenting the highest quality, coloration, and dimensionality. These products offer the most realistic representation of old-world wood shake and quarried slate roofing.

# Designer Shingles

Also known as architectural or dimensional shingles, designer shingles are the most prevalent asphalt shingles installed in North America. These products are manufactured with two or more layers of asphalt that are fused together for a thicker and richer multi-dimensional appearance, and are engineered to replicate the aesthetics of wood shake and natural slate roofing. Designer shingles are typically heavier than strip shingles and have improved warranty protection.

# Cool Roof Shingles

Landmark, shown in Solaris Heather Blend

## THE COLLECTION

CertainTeed's Cool Roof Shingle Collection puts cool roof technology to work for you.

Our advanced roofing granules reflect solar energy and radiant heat far better than traditional roofing shingles, reducing your roof's temperature in the summer.

All are rated by the Cool Roof Rating Council (CRRC) and can be used to comply with the 2022 California Title 24 Part 6 Cool Roof Requirements.

Select colors can be used to comply with Los Angeles County, California Title 31 cool roof requirements for steep-sloped residential construction.

**Choose from three spectacular solar shingle line-ups.**

# HIP AND RIDGE ACCESSORIES

## Shadow Ridge®

- Used for hip and ridge capping
- Single-layer coverage for product versatility
- Sealant strip for maximum adherence
- Dimensions are 13 1/4" x 39 3/8", with a 5 5/8" exposure
- Can be used on shingle-over vents or directly over centerline of hip or ridge
- Available in complementary product colors (see individual Roofing Plant Catalogs for color availability)
- UL 2218 Class 3 Impact Rated

## Shangle® Ridge

- Hip and ridge capping
- Two full layers
- 12" width allows application over standard ridge vents
- Full 8" exposure
- Matches all Grand Manor, Highland Slate and Carriage House colors
- Algae resistant
- UL 2218 Class 4 Impact Rated

## Cedar Crest®

- Dimensions are (overall) 12" x 36", separated into individual pieces 12" x 12", with an 8" exposure
- Covers 20 lineal feet per bundle
- Matches all Highland Slate colors

## Mountain Ridge®

- Fiberglass reinforced SBS modified bitumen
- Five layer design with tri-laminate base
- 10" width
- 8" exposure
- Also available in Solaris colors
- UL 2218 Class 4 Impact Rated

# Color Companion Products™ for Low Slope Roof Areas

With CertainTeed Flintlastic® SA, you can coordinate flat roof areas like carports, canopies and porches with your main roof. Flintlastic SA is a self-adhering low slope roofing product available in colors that complement some of the most popular CertainTeed shingles.

## What's behind our #1 rating?

Builders and remodelers across America know certain things to be true of CertainTeed. For starters, we've been in the roofing business for over 100 years. We have thousands of satisfied homeowners. The process of building that satisfaction begins the moment you turn to us.

CertainTeed offers you the broadest range of color and style choices. But you'll see it's not style over substance. You'll get a roof that's made from the highest quality materials and backed by a strong warranty program. It's our promise to you: quality made certain, satisfaction guaranteed.

# Underlayment Protection

## GRACE ICE AND WATER SHIELD® SERIES AND WINTERGUARD®

When snow and ice melt, trapped water can infiltrate to damage the roof deck and building interior.

Grace Ice and Water Shield series and WinterGuard series are installed under shingled roofing to prevent water damage from ice dams, as well as wind-driven rain.

Grace Ice and Water Shield series and WinterGuard series are designed for use on roof decks as a waterproofing underlayment beneath shingle, slate and tile roofs to prevent leakage due to water backup from ice dams or wind-driven rain. Grace Ice and Water Shield HT, Grace Ultra and WinterGuard HT, an advanced waterproofing underlayment, is specially formulated to resist high roof temperatures and are CertainTeed underlayments to be warranted for use under metal roofs. Grace Ice and Water Shield series and WinterGuard series are most commonly used in critical areas such as roof eaves, valleys and low-slope applications.

Grace Ice and Water Shield series and WinterGuard series are classified by Underwriters Laboratories (UL) to be a suitable underlayment for use in any UL Class A, B or C fire rated shingle system, and it is manufactured to meet ASTM D1970.

### Grace Ice and Water Shield

- Industry's leading waterproofing roof underlayment that protects home and contractor's reputation for over 45 years
- Forms watertight seals for high performance in severe weather protecting roofs from water intrusion due to wind-driven rain and ice dams

### Grace Ice and Water Shield HT

- Specifically designed to meet the challenges inherent in metal roof assemblies with in-service temperature up to 260°F
- High thermal stability for superior performance under the most demanding conditions

### Grace Select

- lightweight and easy to handle and install, while meeting or exceeding industry standards for fastener sealability
- Smooth surface provides better lap adhesion

### Grace Ultra

- 100% butyl adhesive formula is designed for extreme temperature roof assemblies like desert climates and high altitude with in-service temperature up to 300°F (Ideal for copper, zinc, and COR-TEN® Roofs)
- Compatible with EPDM and TPO roofing materials to provide watertight transition between low slope & steep slope roofs

### WinterGuard® Sand and Granular

Waterproofing shingle underlayment is a composite of asphalt polymers, ensuring vapor-tightness and elasticity. It seals around nails and is part of the CertainTeed Integrity Roof System®, delivering top-notch performance.

### WinterGuard® PRO

High-temperature, film surfaced waterproofing underlayment.

### DiamondDeck®

DiamondDeck is a synthetic, scrim-reinforced, water-resistant underlayment that can be used beneath shingle, shake, metal, or slate roofing. It is manufactured to provide best-in-class performance in terms of both weather protection and contractor safety. 10-square roll (4-foot wide and 250-foot long) is easier to handle and faster to apply than standard felt rolls.

### RoofRunner®

Lightweight synthetic polymer-based underlayment outperforms felt and outclasses other synthetics. Designed for use on roof decks as a water-resistant layer beneath asphalt roofing shingles, this scrim-reinforced underlayment includes a special top surface treatment that provides excellent slip resistance, even when wet. Large roll size - 4 ft wide x 250 ft long - speeds application.

### RoofRunner® AIR

RoofRunner® AIR is a breathable synthetic roof underlayment with a multilayer coated structure that promotes rapid roof deck drying. Designed for use on roof decks as a water-resistant layer beneath asphalt roofing shingles, the unique permeable layers allow moisture to escape and help to prevent mold, rot, and structural damage.

The robust technology found in each layer of RoofRunner AIR contributes to its optimal rating of 15 perms or greater. It's important to maintain a dry and healthy roof deck with a full assembly that includes proper ventilation and attic space that contribute to a breathable roof structure.

# SureStart™ Protection

Because CertainTeed roofing products are manufactured to the highest quality standards, we confidently include the additional assurance of SureStart™ protection with all CertainTeed shingles. SureStart provides the strongest protection you can get in the vital early years after your new roof has been installed.

Simply put, if a manufacturing defect is discovered during the SureStart period, CertainTeed will provide reimbursement of 100% of the cost of the shingles and labor to repair the defective shingles or apply new shingles to replace the defective shingles.

See actual warranty for details and limitations.

Workmanship			✓***	✓****

**NOTE: XT™25 shingles carry 10 years with 3-STAR, 20 years with 4-STAR Coverage and 25 years with 5-STAR Coverage, including the features as indicated above.**

Fully transferable for 10 years with 3-STAR Coverage, 12 years with 4-STAR Coverage, and 15 years with 5-STAR Coverage.

\*Applies to single-family detached houses. Duration for all other types of structures is limited to 25 years.

\*\*Applies to single-family detached houses. Duration for all other types of structures is limited to 30 years.

\*\*\*Workmanship is covered for 10 years.

\*\*\*\*Workmanship is covered for 25 years.

**Low-Slope Roof Sections:** If a project being roofed with CertainTeed shingles has a low-slope section 1,000 square feet (10 squares) or less using our Flintlastic® SA modified asphalt self-adhered roof system, or our SMARTCOAT™ liquid-applied roof restoration systems, installed by a CertainTeed Commercial Credentialed contractor, SureStart Plus extends FULL coverage for the duration of the low-slope warranted period, depending on the level of protection you choose. Residential shingles must be a minimum of one and a half times (1.5X) the amount of flat roof submitted. See Low-Slope Residential Limited Warranty for system requirements and warranty durations.

\*\* Wind warranty upgrade to 130 mph available. CertainTeed starter and CertainTeed hip and ridge required.

## High-Performance Starter

Starter Course shingle specifically for use with Grand Manor and Highland Slate—and the only approved installation alternative to using the shingles themselves.

- 10" x 36", 102 lineal ft. per bundle, 34 shingles per bundle
- Provides labor and cost savings by not cutting shingles
- Dual sealant strip for increased wind resistance
- Better look with straight factory-cut eave edge

## Presidential Starter

Required for Presidential Shake TL and Presidential Shake applications.

- 13 1/4" x 40" (required double layer), 36.5 lineal ft. per bundle (based on 2-layer application), 22 shingles per bundle.
- Two layers of straight factory-cut eave edge
- Available in the entire Presidential Shake TL and Presidential Shake color line
- Assures Class A fire rating
- Saves significant installation time

## CertainTeed Swiftstart® and Swiftstart® XL

CertainTeed Swiftstart metric starter shingle is designed specifically for use with CertainTeed Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with Swiftstart.

- Code-compliant, meets min. 2" headlap requirement for metric shingles; many competing products do not
- Each 18-piece bundle covers 116 lineal ft.
- Recommended for use to obtain enhanced warranties
- Pre-perforated starter course shingles for use with Patriot XL shingles. 69' lineal ft. per bundle; 21 shingles per bundle.

## Shangle® Ridge

- Hip and ridge for Grand Manor, Carriage House and Highland Slate; 10 lineal ft. per bundle; 15 shingles per bundle

## Shadow Ridge® and Shadow Ridge® XL

- Hip and ridge for Landmark TL and Landmark Series; 45 lineal ft. per bundle; 24 shingles per bundle
- Hip and ridge for Patriot XL. 29.6 lineal ft. per bundle; 63 (21 3-pc units) shingles per bundle.

## Cedar Crest®

- Hip and ridge for Highland Slate; 20 lineal ft. per bundle

## Mountain Ridge®

- Hip and ridge for Presidential TL, Presidential Shake, Landmark TL, and Landmark Series.  
UL 2218 Class 4 Impact Resistant

## Ventilation

- CertainTeed Ridge Vent 9" filtered Class A
- CertainTeed Ridge Vent 9" filtered
- CertainTeed Ridge Vent 12" filtered
- CertainTeed Intake Vent filtered
- CertainTeed Rolled Ridge Vent filtered
