

## FLINTLASTIC® SA ARCTIC EDGE™

### COLD LAP TAPE

#### Product Information

**Description & Use:** Flintlastic® SA self-adhered membranes deliver an excellent bond when ambient temperatures are 50°F and rising. Arctic Edge is a revolutionary auxiliary tape engineered to significantly boost Flintlastic SA adhesion in temperatures as low as 35°F. Extend the speed and safety benefits of Flintlastic SA into the cold season; use only as needed.

The proprietary, pressure sensitive acrylate tape is supported by a polyester scrim and comes wound with dual-sided release film. Arctic Edge is used during side lap and base/interply end lap application. It also replaces the need for FlintPrime® Aerosol as an adhesion promoter on metal details in cold weather.

**Coverage:** 260 lineal feet per roll, 4" width; aligns with approximately four (4) rolls of Flintlastic SA PlyBase or eight (8) rolls of Flintlastic SA MidPly, SA Cap, SA Cap FR.

**Precautions:** For ease of handling and transfer to cold surfaces, keep Arctic Edge at or above 65°F when not in use. Do not apply to frosted, damp or wet surfaces. If ambient temperatures are below 50°F make certain that Flintlastic SA rolls are kept in a heated location and draw materials as needed. If exposed to cold temperatures, allow them to warm to 50°F before use. Never use a torch to heat rolls.

**Do Not Leave Base or Interplies Exposed To The Weather.**

Cover in the same day with optional SA interply and/or SA Cap/SA Cap FR.

#### Physical Properties

<b>Liner Construction</b>	PP-Foil, 80 µm, white
<b>Thickness</b>	0.095 mm
<b>Adhesive Construction</b>	Pure acrylate, 100 g/m <sup>2</sup> , transparent
<b>Carrier</b>	Polyester scrim
<b>Adhesion [N/25mm] in accordance to AFERA 5001 on steel</b>	37

**Storage:** Store in cool, dry conditions.

#### Warranties

CertainTeed supports Flintlastic SA roof systems with Limited (product only) and No Dollar Limit (NDL, product and workmanship) warranties. Warranty type and duration is dependent on roof system configuration and contractor selection. Only CertainTeed Gold and Silver Star Contractors are eligible to apply for NDL warranties on specific roof projects. Arctic Edge Limited Warranty aligns with the type and duration of overarching Flintlastic SA Limited Warranty. For more information, see CertainTeed Commercial Roof Systems Specifications manual or contact Commercial Roofing Technical Services.

#### Technical Assistance and Services

CertainTeed provides technical assistance in the design, selection, specification and application guidelines for all CertainTeed Commercial Systems. Architectural and field representatives are available for consultation within each region. For more information, contact CertainTeed Commercial Roofing Technical Services at 800-396-8134 x2.
