REDEFINING WHAT’S POSSIBLE WITH PANELS
Techstyle® Acoustical Ceilings
Take panels further than you thought possible

Go bigger and bolder than ever before with CertainTeed Techstyle® Acoustical ceilings for a level of durable performance and design freedom you never imagined.

**Techstyle Acoustical Panels feature:**

- An exceptionally smooth surface for a premium look with brighter whites, more vivid colors, and more realistically detailed wood grains
- Large format panels - up to 4’ x 8’ for a clean, monolithic look and faster installation
- Lightweight, sag-resistant fiberglass construction that remains flat, even in high-moisture applications
- Fully customizable surface - a wide range of patterns and colors

**White, Wood, Color or Custom**, Techstyle will change the way you design ceilings.
Unique construction

The extraordinary features of Techstyle® ceilings all stem from its unique construction. Each panel is comprised primarily of fiberglass. The interior is a channeled honeycomb structure that delivers incredible performance benefits, while the exterior is an ultra-smooth fabric surface with a premium appearance that elevates any design.

Unmatched performance

- **High quality surface.** Smooth, non-woven polyester fabric holds color, resists scratches and stays beautiful.
- **Sag-resistant and durable.** Flexible and resilient, even our largest panels remain smooth and flat, unaffected by moisture and resistant to surface and corner damage.
- **Highly sound absorbent.** Techstyle panels absorb both high and low frequencies at an impressive level, with up to NRC 0.85 and CAC 17 with no backer.
- **Lightweight and simple to install and maintain.** At just 0.30 lbs./sq. ft., Techstyle panels are remarkably easy to handle and keep clean.
- **GREENGUARD Gold Certified.** Techstyle ceilings meet strict certification criteria for low VOC emissions, making them safe for sensitive environments such as schools and healthcare facilities.

*The GREENGUARD INDOOR AIR QUALITY CERTIFIED Mark is a registered certification mark used under license through the GREENGUARD Environmental Institute.*
One panel structure. Thousands of design possibilities.

There’s more to Techstyle than typical wall-to-wall grid installations. A full range of trim products enables the same basic panel structure to take on countless creative forms.

CUSTOM SOLUTIONS WITH TECHSTYLE CEILINGS

• Direct mount to walls as well as ceilings to boost design impact and acoustic performance

• Design islands and floating clouds to serve as visual focal points and add acoustic control in open spaces

• Create curves, waves and other shapes for an unexpected sense of motion
Techstyle® White

COOL, CLEAN AND SMOOTH

• Smoother, more sophisticated look than traditional acoustic ceiling tiles
• High light reflectance up to 81% for brighter spaces with less energy costs
• Use large panels to create a monolithic appearance
Techstyle Wood

CONVINCING STYLE AND CONTROLLED SOUND

• Achieve the look of monolithic wood panels without the expense
• Superior acoustic performance without a perforated surface
• Withstands temperature and humidity changes that wood can’t

Techstyle® Color

**BEYOND BASIC WHITE**

- Leverage interior paint and finish trends to add personality to a space
- Choose from a palette of modern neutrals and bold accents
- Unique option for wayfinding elements

Why stop at standard colors when the unique construction of Techstyle lets you create fully custom ceiling panels?

- Custom color and woodgrain matches
- Stripes, textures and patterns
- Letters, words and logos
- Individual graphic panels
Versatile installation options

Techstyle® ceilings are available in two different panel styles. Each accommodates a different installation method and results in a different overall aesthetic. Self-squaring elements ensure easy installation with precise positioning.

Whatever installation you choose, Techstyle panels are Class A fire rated according to ASTM E84 and GREENGUARD Gold Certified formaldehyde free. Enhanced soil resistance and cleanability make panel maintenance easy.

**Lay-In Panels** are designed to rest in a standard 15/16” or 9/16” suspension system like a typical trim-edged acoustical ceiling tile, creating an exposed grid look.

**Swing-Down Panels** are designed with a special clip that attaches directly to a standard 15/16” suspension system creating a semi-concealed visual. The panels can detach to swing-down on one side, offering downward access to the plenum.

**Simplified Suspension Choices**

For ease and convenience, Techstyle is available with CertainTeed 15/16” suspension system.

Techstyle panels are also compatible with the **Techstyle Suspension System**, which features the thinnest visible grid lines available, along with easy integration of light fixtures and diffusers.

**Largest Ceiling Panels in the Industry**

Design with individual lay-in panels up to 32 sq. ft. and swing-down panels up to 24 sq. ft. in a variety of width and length combinations.

Easy access and fixture integration

Techstyle makes it easy to install and integrate lighting and diffusers with designated fixture trim options. Compatible lights and diffusers can be found on our website at CertainTeed.com/Techstyle.

Swing-down panels attach to the grid and suspend 1-1/8” below.

TRIM OPTIONS

A wide variety of trim profiles are available, enabling everything from direct mounting and wall mounting to floating clouds and island installations, as well as fixture integration.
