

CertainTeed Ceilings Technical Services Memo

Subject:	Maintenance Instructions for CertainTeed Ecophon Akusto /Super G Wall Panels		
Date:	August 27, 2019	Tel:	800-233-8990

Handling

Clean cotton gloves should be worn at all times, both during the initial wall panel assembly and any subsequent activity that may require a panel to be removed. When panels are removed they should be taken completely out of the frame and stored on a flat surface. Panels should be laid face to face in order to prevent any unnecessary soiling and damage during their temporary displacement.

Cleaning

Daily dusting may be carried out with a dry, soft (microfiber) cloth, soft brush or similar vehicle for this type of action. Daily vacuum cleaning may also be carried out using the reduced suction inherent to the soft brush attachment typically used on textiles and curtains. Weekly wet wiping may be carried out using a soft sponge or (microfiber) cloth that has been saturated with a mild detergent and water solution of the same concentration recommended for use on indoor painted surfaces. Wet wiping is performed using circular movements with moderate pressure during wiping of the panel surface.
