BIG by design. Acoustic by nature.

The Gyptone® BIG™ family of products allows you to create beautiful continuous ceilings, seamlessly blending world-class beauty with acoustics, performance and sustainability. The panel’s large format makes it possible to create sweeping wall-to-ceiling surfaces without visible joints or breaks. Each board includes beautifully patterned perforations, which together with the gypsum substrate and acoustic tissue backing, provide excellent acoustics. Offered with the Gyptone BIG (GK) Grid System and integrated inspection hatches, the end result is a ceiling system that is ready to install, fill and paint.

- Smooth, paintable surface, simplifies installation and maintenance
- Suitable for direct or suspended screw mounting
  (Gyptone BIG (GK) Grid System available)
- Complementary Gyptone ceiling tiles available for each pattern
- Tapered edges for easy installation and finishing
- Low VOC Compliant: Independently tested and certified by Berkeley Labs
- Meets seismic and other code requirements
- Class A flame spread

Gyptone BIG is Accessible.

Gyptone inspection hatches are quick to install and virtually invisible as the gap between the ceiling and the hatch is minimal. This fully integrated solution is available for all Gyptone BIG patterns and allows for easy access to the plenum.

Sixto 63

The innovative Gyptone BIG Sixto 63 features eight even-sized sections of hexagonal perforations (12mm). These openings, together with the gypsum substrate and acoustic tissue backing, provide sound absorption up to a Class C and an NRC up to a 0.70.1

Features hexagonal perforations that are 12mm wide

Sixto 65

The Gyptone BIG Sixto 65 includes the same 12mm hexagonal perforations as the Gyptone BIG Sixto 63, in three even-sized sections, on a 3’ x 9’ board to accommodate unique ceiling spaces. It also offers an improved acoustical performance, with an NRC of 0.85.1

Features hexagonal perforations that are 12mm wide
Quattro 41

With eight even-sized sections that have precisely etched 12mm square perforations, the Gyptone BIG Quattro 41 offers sound absorption up to a Class C, with an NRC of 0.80.1

Quattro 41 is perforated with a repeating square pattern

Quattro 46

Gyptone BIG Quattro 46 features smaller 12mm square perforations like Quattro 41, but with a larger band of solid gypsum bordering the perforated areas. It offers Class A flame spread, with an NRC of 0.80.1

Quatto 46 is perforated with a repeating square pattern

Line 6

The Gyptone BIG Line 6 features a repeating pattern of 80mm x 6mm rectangular perforations. It offers sound absorption up to a Class C and an NRC of 0.65.1

Includes repeating rectangular perforations that are 80mm x 6mm
