### **Handling**

Clean cotton gloves should be worn at all times, both during the initial ceiling assembly and any subsequent activity that may require a panel to be removed. When panels are removed they should be taken completely out of the grid and stored on a flat surface. Panels should be laid face to face in order to limit unnecessary soiling and damage during their temporary displacement.

### **Cleaning**

Panels can be cleaned of dust and loose dirt particles by vacuuming with a soft brush attachment.
