Custom lengths available, contact us for more information.

We’ve saved an incredible amount of time installing NO-COAT versus stapling on plastic corner bead. We saved over 30% on mud per floor and over 50% on labor costs – it’s awesome.

Kevin Krog, Acoustic Ceilings and Partitions, NY

No matter what we used or did, we always had cracking and we had a 80% callback rate. It was a fact of business. We switched to NO-COAT and 200 houses later, our callback rate is zero. The builder is happy because he knows he is never going to have to call us back for damaged corners.

Zach Jarvis, Owner ZDJ Drywall, LLC Ogden, Utah
NO-COAT FLEXIBLE CORNERS

These flex roll products are ideal for off-angle applications, both short and long runs, long columns and soffits. Wide flange covers large gaps and poor framing. Built-in flexible hinge fits any inside or outside corner angle and creates crisp, straight lines.

NO-COAT ARCH

ARCH tapes are arches that flex and conform to archs. Soft profile fine-tune poor framing and create a perfectly smooth, round curve.

NO-COAT ARCH DOUBLE BARREL HOPPER

The Double Barrel Hopper is set up for all angles, all the time. Install off-angles, inside 90s, bullnose, and outside 90s.

Certainteed TOOLS allow for high speed installations and flawless results.

CertainTeed TOOLS allow for high speed installations and flawless results.

NO-COAT STICKS

One of our best selling products, NO-COAT Sticks are made with our patented SLAM design. NO-COAT pre-cut stick lengths withstand severe impacts, settling and seismic movements without cracking, denting, chipping or peeling. Easy to install lengths deliver perfect corners in record time.

INSIDE 90

OUTSIDE 90

3/8" BULLNOSE

3/4" BULLNOSE

Stainless steel gates accommodate off-angles, bullnose, inside 90s, and outside 90s.

SLAM® DESIGN INTEGRATES NEW TECHNOLOGIES AND MATERIALS THAT OUTPERFORM ALL OTHERS.

SLAM® DESIGN INTEGRATES NEW TECHNOLOGIES AND MATERIALS THAT OUTPERFORM ALL OTHERS.

“NO-COAT went on so fast, I got done in 1 1/2 days what would have taken four days with metal bead. And having NO-COAT speeds the finishing process so much.”

Hector Valdez, KHS&S, NV

“Using NO-COAT we’re saving 50% of mud per floor and 25% of labor per floor. And as we have used it more, we are saving even more time and money. We saved $90,000, on one lower job alone, I would have never believed it.”

Douglas Downs, Taping Superintendent, Ford Contracting

“New Double Barrel Hopper system is so much faster. Two of us put on 80 sticks of NO-COAT trim in 8 1/2 hours. You don’t have to change attachments.”

Todd Soucie, Taper Foreman, Troy Metal Concepts

“NO-COAT went on so fast, I got done in 1 1/2 days what would have taken four days with metal bead. And having NO-COAT speeds the finishing process so much.”

Hector Valdez, KHS&S, NV

“I was very shocked, we’re saving 50% of mud per floor and 25% of labor per floor. And as we have used it more, we are saving even more time and money. We saved $90,000, on one lower job alone, I would have never believed it.”

Duke Gross, Taping Superintendent, Ford Contracting
