Tapered Profile Design – makes finishing fast and easy.

Tired of your flex...
- Popping off the walls?
- Cracking?
- Blistering?

Spending too much time...
- Pre-creasing?
- Pre-measuring?
- Applying excessive mud?

LEVELLINE’s Tapered Profile Design eliminates installation headaches and callbacks. Installing off-angles, inside and outside corners is faster and easier with LEVELLINE’s tapered flex design. Our flex goes straight from the box or roll onto the wall, and requires less mud to apply and finish.

LEVELLINE’s superior corner construction (tapered plastic core, joint tape and formulated surface paper) ensures corners will not split or dent. LEVELLINE can also withstand structural settling from green lumber and seismic movement without cracking or popping off the wall.

OUTPERFORMS FLAT FLEX AT EVERY ANGLE, ON ANY CORNER.

2.75” x 100’ (69.9 mm x 30.5 m)
Available in individual rolls or a 12 roll case

Store in a cool, dry area. Install with all-purpose drywall joint compound.

Directions: Step (1) Apply all-purpose joint compound to corner. Step (2) Press LEVELLINE trim into position and straighten. Step (3) Using a 4” finishing knife, remove excess mud and let dry. Step (4) Use a 6” finishing knife to skim over corner, let dry. Sand and finish.
