LEVELLINE®

Drywall Corner

Installation Instructions

LEVELLINE FLEXIBLE CORNERS

Drywall corner trim that flexes to any inside or outside corner angle. Perfect for off-angles, tray ceilings and bay windows.

- Tapered Plastic Core will not split or dent
- Adjusts to any angle; eliminates precreasing allowing for instant application.
- Permanently bonds corner to drywall – accepts any finish.

1. Open LEVELLINE box and feed product through slot on side of box. Insert hook of tape measure into narrow slot to measure length of LEVELLINE needed. Cut to length with scissors.

2. With a 4" (100 mm) tapping knife, apply Taping or All-Purpose joint compound to each corner at least 4" (100 mm) wide and 1/2" (6 mm) thick.

3. Press Levelline into position and straighten. Firmly embed corner trim using the tapping knife or CertainTeed roller. Remove any excess compound and allow to dry for 24 hours.

4. With a 6" (150 mm) tapping knife, apply a second coat of Taping or All-Purpose joint compound, carefully feathering the compound 6" (150 mm) out from the nose of the trim. Allow to dry.

5. With a 8" (200 mm) finishing knife, apply Finishing or All-Purpose joint compound to the corner as smoothly as possible, feathering out the final coat 8" (200 mm) from the nose of the trim. Allow to dry. Sand and paint.

LEVELLINE STICK CORNERS

LEVELLINE Outside 90° pre-cut sticks are durable, easy-to-install corners that deliver perfect corners in record time.

- Durable - does not have a memory, less waste, less dents, no rust
- Easier for labor, easier to cut, lighter, not as sharp
- Nominal price point vs metal products
- Quality product with an extended lifetime over metal corners

When installing drywall for 90° Corners, hang drywall as shown. With a 4" (100 mm) tapping knife, apply Taping or All-Purpose joint compound to each corner at least 4" (100 mm) wide and 1/2" (6 mm) thick.

1. Apply LEVELLINE corner trim to the wall and press into position, ensuring that the trim is tight to the ceiling. Firmly embed corner trim using the tapping knife or CertainTeed roller. Remove any excess compound and allow to dry for 24 hours.

2. With a 6" (150 mm) tapping knife, apply a second coat of Taping or All-Purpose joint compound, carefully feathering the compound 6" (150 mm) out from the nose of the trim. Allow to dry.

3. With a 8" (200 mm) finishing knife, apply Finishing or All-Purpose joint compound to the corner as smoothly as possible, feathering out the final coat 8" (200 mm) from the nose of the trim. Allow to dry; sand and paint.
