**Anchor, Base Ply and Cap Sheet**
Mechanically attach or fully adhere (self-adhered, torch, cold process or hot asphalt) to break in roof plane. Proper attachment is defined by specific system, product selection and deck type.

**Tape (Recommended)**
Tape off desired edges for clean detail aesthetic.

**Polyester Reinforcement Preparation (Recommended)**
Prepare SmartFlash ONE Reinforcements prior to applying any resin. Cut 6” width SmartFlash ONE Reinforcement to appropriate lengths. Reinforcement shall overlap 2” anywhere an overlap occurs.

**Flexible Liner**
Mechanically attach with appropriate fasteners, 9” o.c.

**Weatherproofing Strip**
Self-adhere WinterGuard® Metal, WinterGuard HT or Flintlastic® SA PlyBase/SA MidPly.

---

**Manufactured Bellow**
Set in 1/8”-1/4” uniform bed of FlintBond® Trowel adhesive and mechanically attach with appropriate fasteners, 4” o.c.; endlaps shall be set in FlintBond Trowel with two nails.

**First Waterproofing Coat**
Using a paint brush, roller or trowel for resin application, apply approximately 30 mils of wet resin to the approximately 4" (100 mm) onto both the Cap sheet and Bellow surfaces.

Immediately lightly press SmartFlash ONE Reinforcement into wet resin across seam of Cap and Bellow, extending equally 3” onto each surface; saturate and coat Reinforcement with resin such that no Reinforcement is visible. Allow to dry 2-3 hours (assumes 70°F or 20°C).

**Second Waterproofing Coat**
Apply approximately 30 mils of wet resin to entire surface covered by first coat.

**Granules (Optional)**
If desired, broadcast granules into the second waterproofing coat before it forms a skin.
