IMPACT & FIRE RESISTANT COMMERCIAL SOLUTIONS

CertainTeed
SAINT-GOBAIN

Does Your Building Face Extreme Weather?

Flintlastic® SA Cap FR is engineered for applications that require premium fire and impact resistance. Reduce your exposure to repair costs with Flintlastic SA Cap FR roofing systems.

CLASS 4 IMPACT RESISTANCE

The UL 2218 classification is a national standard for roof impact resistance, rating materials from Class 1 through 4, with Class 4 being the toughest.

CLASS A FIRE RESISTANCE

A Class A designation is afforded to roof systems that are effective against severe fire exposure and do not spread fire. The system must pass a Spread of Flame test, an Intermittent Flame Test (combustible roof decks only) and a Burning Brand test (combustible roof decks only).

RECOMMENDED CLASS A, CLASS 4 SYSTEMS

Warranty Duration	Insulation	Base	Ply	Cap
