1 Depends on plant: Products made at Toronto, ON; Moundsville, WV; and Carrollton, KY, plants contain enough recycled content to qualify as EPP for LEED-H.

2 Contributes to Energy Efficiency – This product reduces the energy consumption of the building in which it is installed by reducing the energy needed to light, heat, and/or cool the building.

3 Reduces Carbon Footprint – This product reduces the carbon emissions related to the building in which it is installed either because less fossil fuel was used in its production or installation than comparable materials, or because the product reduces the energy used in the operation of the building (i.e., heating, cooling, lighting, etc.).

4 CedarBoards D6 only.

5 GreenCircle Certified, LLC provides third-party verification and assurance to builders, regulators and consumers that products labeled with the GreenCircle mark have undergone a rigorous audit process that verifies compliance with the environmental and sustainability claims of the manufacturers.

6 Forest Stewardship Council (FSC) – Decoustics Quadrillo<sup>®</sup>, Solo™ and Solo M™ ceiling panels only.
