Important: Fire Safety Information

CertaWrap is a housewrap that requires little maintenance. Nevertheless, common sense dictates that builders and suppliers of housewrap products store, handle and install housewrap products in a manner that avoids damage to the product and/or structure. Owners and installers should take a few simple steps to protect housewrap products from fire. Housewrap is made from synthetic materials and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues, and combustible materials, such as dry leaves, mulch and trash, away from housewrap.
