Components:

1. Gyptone Panels (2’x2’)

2. CertainTeed 15/16” Classic Main Runners (for Trim Edge)
   (or CertainTeed 9/16” Elite Narrow Main Runners for Narrow Reveal)

3. 15/16” Classic Cross Tees
   (or 9/16” Elite Narrow Cross tees)

4. CertainTeed Ceilings 15/16” or 9/16” Wall Angle
   or Shadow Molding

5. 12 Gauge Hanger Wire

Wear clean white cotton gloves when handling Gyptone panels.
Pre-Installation: Please read CertainTeed Ceiling’s Pre-Installation Instructions before you begin these installation instructions.

1. Installing Wall Angle
   a. To install Wall Angle choose a height at least 3” below joists, existing ceilings, ducts, pipes, or wiring, to ensure clearance and maneuverability required to install the panels (integration with diffusers and light fixtures may dictate a greater depth of system).
   b. Mark the desired height for the finished surface of the ceiling on all four walls (see Steps 2-3).
   c. Attach Wall Angle using appropriate fasteners.

See Step 2 for Perimeter Detail Options
Gyptone Perimeter Detail Options

1. **Cut Square edge panel**

   Note: This is the preferred option for perimeter treatment with Gyptone Panels. Regardless of whether the field panels are square edge or narrow reveal edge, the use of square edge Gyptone Base 31 panels is recommended for perimeter panels.

2. **Cut Square edge panel w/ Shadow Molding**
2\textsuperscript{3} Cut Reveal edge panel

Note: Since Reveal edges cannot be field-cut into perimeter panels, each panel is straight cut at the wall, and the flanges are bent down to elevate the grid member up from the perimeter trim.

2\textsuperscript{4} Cut Reveal edge panel w/ Shadow Molding

Note: Shadow Molding (by others) must have a 1/4” reveal.
3. Install Hangers
   a. Mark lines for each of the main runners (4’ on center).
   b. Pull a string line along the path that the first main runner will take. Attach the line directly below the wall molding.
   c. Hangers are placed every 48” along the main runners, at a max of 24” from the walls.
4. Install the main runners
   a. Install the first section of main runner, with cut edge sitting on the wall molding.
   b. Attach the main runner to wire.
   c. Repeat for the next sections of main runner.
   d. Make sure that all of the main runners are hanging at the same level
5. Install 4’ Cross Tees and Border Tees
   a. Cut in border cross tees. Use a string line to make sure the main runners are straight.
   b. Install cross tees as needed.
   c. Check to see if the suspension system is square. Make adjustments as needed.
6. Install remaining 2’ cross tees
   a. Install remaining cross tees.
   b. **Check to see if the suspension system is square. Make adjustments as needed.**

7. Install Panels
   a. Cut border panels as needed.
