Specifications

- Two-piece laminated fiber glass-based construction
- Classic shades and dimensional appearance of natural wood or slate
- 229/236 lbs. per square

For U.S. building code compliance, see product specification sheets.

Certainteed products are tested to ensure the highest quality and comply with the following industry standards:

Fire Resistance:
- UL certified to meet ASTM D3018 Type 1

Wind Resistance:
- UL certified to meet ASTM D3018 Type 1

Tear Resistance:
- UL certified to meet ASTM D5462
- CSA standard A123.5

Wind Driven Rain Resistance:
- Miami-Dade Product Control Acceptance Quality Standards:
  - ICC-ES-ESR-1389

Warranty

- Lifetime limited transferable warranty against manufacturing defects on residential applications
- 10-year StreakFighter® algae-resistance warranty
- 10-year SureStart™ protection
- 10-year 130 mph wind-resistance warranty*

*See warranty for application requirements.

Integrity Roof System™

A COMPLETE APPROACH TO LASTING BEAUTY AND PERFORMANCE

With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A CertainTeed Integrity Roof System combines key elements that will ensure you have a well-built roof for long-lasting performance.

1. Waterproofing Underlayment

   The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.

2. Water-Resistant Underlayment

   Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.

3. Starter Shingles

   Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.

4. Shingles

   Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.

5. Hip & Ridge Caps

   Available in numerous profiles, these accessories are used on the roof’s hip and ridge line for a distinctive finishing touch to your new roof.

6. Ventilation

   A roof that breathes is shown to perform better. CertainTeed Ridge Vents, in combination with intake vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.

Brighter, more vibrant, dramatic depth of color.
