5 Feet

Traditional Siding Panel - 12 Feet 6 Inches

## The Difference is Seamlessly Clear Two Story Wall, 25' Wide

### Long on Looks

With traditional 12' siding panels, seams appear every two to three feet. Monogram's extended length panels can significantly reduce seams.

## The STUDfinder™ Installation System

Monogram was the first siding engineered to include an integral installation guide on each panel. From the first nail to the last, the patented STUDfinder™ system is designed to help ensure a precise installation for optimum siding performance.

### Indicator letters help:

- Determine location of studs
- Ensure nails are positioned correctly
- Ensure correct number of nails are used.

### Security and Performance

- Nailing to studs provides a strong and secure connection
- Protects against blow offs from under nailing
- Protects against buckling from over nailing
- Helps avoid nailing into hazardous items between studs like plumbing or wiring

## A Comprehensive System of Value-Added Features

### RigidForm™ 210

This double thick .092" rolled-over nail hem design increases wind resistance and stiffens the panel. This design has been tested\* to withstand wind load pressures up to 210 mph.

\* Wind load rating per VSI wind speed calculation guidelines.

### CertiLock™

The exclusive CertiLock™ locking system features self-aligning multiple bends that snap together with an audible "click" to ensure a secure fit and more consistent installation.

### Heavy-Duty .046" Thickness

Monogram XL panels feature a true .046" thickness for outstanding strength and durability.

### 3/4" Panel Projection

A 3/4" panel projection provides excellent rigidity for straighter-on-the-wall performance.

PermaColor System assures color performance, resistance and durability. Utilizing the newest technology and state-of-the-art formulations, CertainTeed backs their vinyl siding with PermaColor Lifetime Fade Protection.
