A. Formed Reglet  
10’-0” Lengths  

B. Mechanical Fasteners  
at 12” o.c. (6” from ends)  
(By Installer)  

C. Sealant  
Continuous Bead of Sealant, 3/8” Wide  
(By Installer)  

D. Roofing or Single-Ply Membrane  
(By Installer)

NOTES:  
#1 - Isolate all metal parts from ACQ treated wood or other galvanically  
incompatible material with appropriate membrane material.  
#2 - Appliance attachments, such as lightning rods, signs, or antennae  
that penetrate the water seal, induce a galvanic reaction, or otherwise  
compromise the effectiveness of the roof edge system, shall be  
eliminated or isolated to prevent problems per section 8.0 of ANSI/SPRI  
ES-1. Appliances should be isolated from or not attached to the roof  
edge system. Consult the lightning protection system manufacturer for  
specific attachment instructions.
STEP 1: Installation of Reglet
Ensure that roofing membrane is continued up the side wall a min. of 18". Set the reglet over the membrane. Attach using mechanical fasteners (by installer). Locate fasteners in each pre-punched holes. Be sure to overlap adjoining piece of reglet a min. of 1" to allow for thermal expansion.

STEP 2: Installation of Sealant
Apply a continuous (3/8") wide bead of sealant to the top side of the reglet (see diagram above).

CORNER APPLICATION
Field bevel cut reglet and counter flashing for appropriate corner.
