**Enrich with Varied Textures and Colors**

Mixing multiple textures, styles and colors on homes is more popular than ever, and CertainTeed’s unsurpassed product range gives you the opportunity to add your own creativity to this exciting trend.
Add Curb Appeal

Give a home a beautiful high-value facelift. **Dress It Up**

Victorian style homes will convey both elegance and charm by combining multiple styles, textures and trim to enhance shapes and lines. Achieve this by mixing Cedar Impressions Straight Edge and Staggered Edge Shingles, complemented with Cedar Impressions Half-Round Shingles in the gables. Restoration Millwork trim to outline key architectural elements completes the look.
Siding Color Palettes

Start with a Big Splash!

No single element of your home’s exterior has a more profound impact on its overall look than siding. CertainTeed offers over 40 color choices for this important part of your home’s design.

From cool or warm hues, as well as blends, choose one of these siding color palettes that best reflects what you want for your exterior personality. CertainTeed’s innovative CedarLife™ color blends* capture the appearance of natural Eastern White Cedar and Western Red Cedar at various life stages, remaining fresh for a lifetime. Once you dive in with your siding choice, the next step is selecting accent and trim colors. For these elements you can stay within your color palette or combine with another color palette to create your vision – it’s up to you. Use the color trends and tools, as well as the six basic color combination principles on the following pages, as your guide.
Find Your Perfect Color Mix

\{ color trends and guide \}

There is only one rule in home exterior design: There are no rules. Designers are using every conceivable color combination (as well as mixing siding textures and styles) to create distinctive exterior designs with a modern sensibility. You can do the same thing with your home. The optimum color blend has the power to bring out the best features of your home while disguising its flaws. A mix of dark and light colors can accentuate interesting architectural elements, while a mix of similar colors can tone down awkward areas. Bright tones can make a home seem larger or call attention to a feature, while darker tones can make a home appear to recede. Whatever your color goal is, CertainTeed can help you reach it.

Trends from the experts

**Strong Colors**

Architects and designers are increasingly making use of dark colors for exterior walls. Darker roof colors harmonize with deep blues, greens and browns for quiet drama that adds stability. A more neutral roof color allows a strong siding color to stand out and really showcase your home.

**Dark Trim**

Dark trim colors work well to frame a home, outlining architectural details, windows or doors. When you use dark trim, choose a roof color that matches or is a shade lighter than the trim to produce an anchored, coordinated appeal. When using high contrast trim, it’s important to balance its location on the home; it should not dominate any one area.

**Multiple Colors**

The use of two or more exterior wall colors with varied trim colors is part of a trend seen around the country. Secondary colors (also known as accent colors) are used within gables or on additions in most cases. On the safe side, you can mix two colors from the same color family. If you choose to mix color families, consider using one neutral color and be sure to keep in mind the roof color. Two strong siding colors can be combined, but we suggest you use CertainTeed’s visualization tools to get a better idea of whether the colors work well together.

“We had a great time exploring all the product and color possibilities offered by CertainTeed and are thrilled with the final combination. It fits our home perfectly.”
Trim Color Combinations

Traditional white trim accentuates windows cleanly with any color siding, as shown below. Other options (left) include a more subtle combination, with trim and siding closer in hue and intensity; or a reversal of dark trim with light siding as a powerful way to frame your home.

* Restoration Millwork can be easily painted with Sherwin-Williams VinylSafe™ paint colors to complement all exterior siding colors. See Installation Guidelines RM003 for painting instructions.

COOL AND FRESH

Blues, greens and cool grays create the peaceful look of calm water under a clear sky. They work especially well in northern and coastal areas where natural light changes more dramatically with the seasons. Trim in a cool neutral tone (for example, charcoal gray or sterling gray) provides an attractive counterpoint to more colorful siding – think pacific blue, forest or spruce.

WARM AND INVITING

Colors like red, yellow and brown are a good choice when you want to highlight distinctive exterior features. These warm tones evoke the glow of summer and give your home a welcoming feel. Monogram blends and Cedar Impressions CedarLife™ color blends are available in these tones, calling to mind the natural beauty of fresh-cut wood. Warm tans and grays make excellent accents. Trim in darker shades (autumn red, terra cotta, mountain cedar) adds a nice contrast.
SUBTLE AND CALM

If your home’s exterior has a lot of design elements, closely related colors will unify and simplify its appearance. A monochromatic approach – based on different shades of the same color – will have a similar effect. The color palette can be either cool (sterling gray walls, oxford blue gables, pacific blue trim) or warm (buckskin walls with savannah wicker trim); the idea is to limit contrast for a relaxed vibe. Mixing cool and warm colors with similar intensity also works well.

Light siding with white trim is a subtle use of color. This home features Carolina Beaded siding in desert tan with Restoration Millwork trim in natural white and Vinyl Carpentry trim in colonial white for an understated feeling.
An example of a low-contrast combination with trim in color: Cedar Impressions Double 7” Staggered Perfection Shingles in suede with Vinyl Carpentry window trim and Restoration Millwork custom-painted trim in mountain cedar.
Windows stand out with this high-contrast combination of Cedar Impressions Double 7” Staggered Perfection Shingles in terra cotta with Vinyl Carpentry in snow and Restoration Millwork trim in natural white.
Carolina Beaded and Cedar Impressions Shingles in desert tan with striking autumn red and ivy green accents make architectural features come to life with the right balance of texture and color.

CRISP AND EXCITING

Homes with simple designs gain a pleasing complexity when contrasting, but complementary, colors are used. Interesting architectural features make a stronger impression when set off from the primary wall color. A dark roof paired with walls in a lighter color like marigold adds visual distinction; add dark trim – autumn red, for example – and your home will really pop. Dark siding with bright trim is another approach.
STRONG AND BOLD

Get in tune with current trends by choosing darker colors for exterior walls. Rich shades of brown, green and red add drama while also making your home appear smaller, a good thing for a large structure on a tight lot. Deep siding hues serve as visual grounding for a variety of strong trim colors and also work well for accenting recessed areas.

LIGHT AND CAREFREE

Light colors add volume and interest to smaller homes, and soften sharp edges. Homes set back farther from the curb appear to move forward with a color palette that leans to the lighter end of the spectrum. Whether you favor warmer siding tones like sandpiper or desert tan, or cooler hues like silver ash or bermuda blue, the key is to create a pleasing blend of soft and muted tones.

Color Tips
1. Look for color palette ideas in your surroundings, including landscaping, trees and gardens in your neighborhood and the larger area where you live. The colors you pick for your interior walls can also influence your exterior walls.
2. You may be inspired by your neighbors’ color schemes, but it is a good idea to avoid copying them exactly and best to create your own unique combination that sets your home apart. In most cases, you want your home to fit in but not clash with nearby buildings.
3. You need to first consider the appearance of any features on the home that will remain unchanged and harmonize your siding color with them. This includes roofing, masonry, stone, stairways, doors, etc.
4. If your home’s architectural style is very distinct (Colonial, Greek Revival, etc.) you will get best results if your color selection and treatment complements its original design.
