

Solstice®

Introduction

Welcome to the Solstice® Solar Contractor Program

CertainTeed Solstice® Solar Systems deliver energy and lasting beauty and protection for the home. Complete with multiple power ratings, versatile configurations, and state-of-the-art flashing, our high-efficiency panel and shingle systems are designed for seamless integration with low and steep-slope roofs.

A subsidiary of Saint-Gobain, a global leader in sustainable, high-performance construction solutions, CertainTeed has pioneered and perfected roofing science for 120 years. Solstice Solar Systems are backed by the best warranties in the industry.

Our Credential Programs

We are proud to be a trusted and loyal partner to contractors across North America. Our highly trained, quality minded credentialed contractors can participate in unique CertainTeed solar programs. And they can pass the benefits of our industry-leading, single-source warranties on to customers.

An application process and training are required to become a CertainTeed credentialed contractor. Your credential qualifies you for rewards and full access to our suite of digital tools and education. As your business grows and your training progresses, you can level up and gain additional benefits.

See if you qualify for one of our Solstice Solar Contractor Programs.

SOLAR MASTER

- At least 3 years in business
- 10 Installations per year

*Credentials must be renewed every two years. For the first two years, contractors are responsible for workmanship claims.

To begin the application process, contact your CertainTeed representative.

Digital Sales and Proposals

Solstice Solar contractors have access to our innovative, highly accurate design and proposal platform. This streamlined sales tool makes it easy to create proposals and permit packages with a bill of materials. Your sales team only needs to capture homeowner information, including an electric bill, to create an editable proposal ready for the homeowner's signature. This enables you to capture more sales in less time.

Digital Warranty Registration

After installation, the MyEdge™ platform makes it easy to submit warranties for your customers. We offer end-to-end coverage for all solar system components and their professional installation, as well as full rooftop warranty coverage when combined with a CertainTeed asphalt shingle roofing.

Training

We are proud to provide in-depth interactive training for each credential level through Interplay, an online learning platform. To become a credentialed Solstice contractor, your entire team must complete the required training. Additional training is needed to move to higher credential levels.

For our Solar Roofing Specialist contractors, our training team supports your installation crews and salespeople with virtual and in person trainings. Our team will even be onsite for your first installation.

Solar Rewards

Our Solar Rewards program supports credentialed contractors with advertisements and marketing collateral, such as wearables and door hangers. CertainTeed will cover 50% of the costs associated with approved co-branded solar marketing.

Talk to your [CertainTeed representative](#) for more information on how to become a credentialed Solstice Solar Systems contractor.
