The ultimate in StreakFighter® protection.

Take a look around at the roofs in your neighborhood. Are there dark streaks or discolored patches on the shingles?

What you’re looking at isn’t dirt. It won’t wash off. Nor is it moss or fungus. It’s airborne algae. Blue-green algae, which is commonly but incorrectly called “fungus” can create unsightly streaking on shingles. It appears on roofing surfaces throughout the U.S. and Canada and once it’s on your roof, getting it off is no easy matter.

PROTECT YOUR ROOF
Now you can stamp out unsightly black algae roof stains before they have a chance to ruin your roof’s appearance thanks to CertainTeed’s line of algae-resistant shingles with StreakFighter protection.

No algae, no streaks.

THE ADVANTAGE
Your roof maintains its natural luster and beauty free of unsightly splotches, while providing you with the unparalleled level of performance you’d expect from a CertainTeed roof—today and for decades to come.

AVAILABLE IN ALL STYLES.
CertainTeed shingles are available in a wide variety of styles from traditional three-tab strip shingles to designer laminate shingles to the industry’s most prestigious, heavyweight asphalt luxury shingles.

No matter what color or style of CertainTeed shingle you choose, you can rest assured your new roof with StreakFighter will retain its good looks and color for many years to come.

WARRANTY PROGRAMS DON’T COME ANY BETTER THAN THIS.
In addition to our standard limited warranty terms, CertainTeed offers unique, up-front SureStart™ protection against manufacturing defects in the early years following installation when you need it most.* Importantly, all CertainTeed shingles with StreakFighter protection carry a limited warranty against contamination from blue-green algae during the first 10 or 15 years (depending on the product). CertainTeed warrants that algae-resistant shingles will remain free from blue-green algae during this period and will pay, without proration, the reasonable cost to replace or clean the affected shingles.

How can we make such a commitment?
CertainTeed shingles have been meticulously developed, and they are tested and re-tested for resistance to algae. What’s more, our shingles are checked after every production run for an effective amount of copper content, and they are constantly monitored in field conditions to ensure the shingles you purchase meet the highest possible standards.

*See actual warranty for specific details and limitations.

HOW DOES STREAKFIGHTER PROTECTION WORK?
To make shingles resistant to algae, a unique layer of copper oxide, an ingredient with proven algicidal properties, is placed between the mineral core and the ceramic pigment coating. These copper-containing granules are uniformly dispersed throughout the shingle’s exposed surface. The copper leaches gradually over time, providing reliable, long-term protection to the shingle against algae attack.

THREE THINGS EVERY HOMEOWNER SHOULD KNOW ABOUT CERTAINEEED SHINGLES WITH STREAKFIGHTER PROTECTION:
1. They help maintain the natural beauty and coloration of your roof.
2. They eliminate the need for costly and time-consuming algae cleaning maintenance.
3. They are covered by the strongest warranty.

THREE THINGS EVERY HOMEOWNER SHOULD KNOW ABOUT UNPROTECTED SHINGLES:
1. They are highly susceptible to unsightly black staining, smears, blotsches and streaks due to algae spores.
2. They can dramatically decrease your home’s curb appeal.
3. They can potentially shorten the useful life of your shingles.
### Grand Manor®
- One of the heaviest asphalt shingles ever created, Grand Manor’s random tabs are accentuated by shadow lines, giving it the true depth and dimension of natural slate or wood shakes.
