CertainTeed has created a variety of user-friendly visualization tools to help you get a better idea of how well different colors and styles work together.
CertainTeed window and door trim puts out the welcome mat to create a lasting first impression. Lineal trim adds a wider face profile that can help unify and accent a home’s exterior, adding a design element that can be both subtle and distinctive. For even more personality and charm, add crown molding, with or without a corner block above the door or window. It’s a look you’ll appreciate every time you cross the threshold into your beautiful home.
Explore Your Options

From window and door casing to lineals, CertainTeed offers a complete selection of virtually maintenance-free Vinyl Carpentry® to define your home.

**Fast facts:**
Crown molding dates back to the time of the ancient Greeks and Romans, used for "crowning" an architectural element.

**Simple**
3/4" pocket J-channel surround.

**More Definition**
Crown molding and crown molding end caps with 3-1/2" lineal header and 3-1/2" lineal surrounds.

**Classic Enhancement**
Crown molding and crown molding end caps with 5" lineal header, 5" header end caps* and 3-1/2" lineal surrounds.

* Fabricated on site. Please refer to install manual CTS265 for complete instructions.
Using combinations of lineals or adding a corner block offers that little touch to add personality on any home.

Take your home from ordinary to extraordinary. Don’t settle for traditional narrow corner trim with no depth. Go for something distinctive and beautifully unique. Blend traditional lap siding seamlessly around every bend with Vinyl Carpentry® Corner Systems or Cedar Impressions® Shakes and Shingles with inside and outside mitered corners. Use a 4-piece corner system to add a contrasting or coordinating color. Create elegance with an edge by adding corner systems and treatments that frame your home with distinction.

CertainTeed makes it easy to create a masterpiece you’ll enjoy for years to come.
Explore Your Options

CertainTeed’s complete selection of exterior product options is tailor-made to take advantage of the exciting mix-and-match trend: combining various materials, textures, styles and colors to create truly unique exterior designs.

With multiple profiles of Cedar Impressions®, Board & Batten and Vertical Siding to choose from, the possible ways to accent your home are endless.

Fast fact:

Are shingles and shakes the same thing?

Usually, a shingle is sawn on both sides and is thinner at the butt than a shake. A shake is typically split on one or both sides. Shakes are generally thicker with more aggressive, rougher texture that is far less precise than that of a shingle.

Attractive transitions between styles, architectural elements and colors are the best way to ensure a uniform design on any home.
CertainTeed offers a wide variety of wall and soffit transition options for you to create beautiful transitions, while providing protection from damaging moisture.
Explore Your Options

Trim provides a beautiful transition between two styles of siding. On long expanses of board & batten or soffit, a trim piece offers a way to add a signature outline or focal point. Also, consider a trim piece to transition from the wall up to the soffit.

Fast fact:
Band [Belly] Board:
Typically 5” – 6” reveal, can be used as a starter course for siding, a frieze board, a bold line separating levels of a house, or a transition piece in installations where siding alternates between horizontal, vertical and/or specialty profiles.

Create a transition using a band board with foam insert, or create your transition using a wide-faced lineal.

A **band board** makes an excellent wall transition.

**Lineals** can transition lap siding to Cedar Impressions.

Look what you can achieve with color:

Find Your Perfect Color Mix

Designers are using every conceivable color combination to create distinctive exterior designs with a modern sensibility. You can do the same thing with your home. The optimum color blend has the power to bring out the best features of your home. Whatever your color goal is, CertainTeed can help you reach it.

Trim Color Combinations

Traditional white trim accentuates windows cleanly with any color siding, as shown below. Other options (left) include a more subtle combination, with trim and siding closer in hue and intensity; or a reversal of dark trim with light siding as a powerful way to frame your home.

This home has a cool theme (selection of cool grays), but it also has a subtle theme because these grays have similar color intensity and value.

This home has a warm theme with a cool accent (green), and the colors are stronger than a typical home.
