

Too Cold? Not Anymore.

Introducing Arctic Edge

A use-as-needed auxiliary tape for cold weather application of Flintlastic SA membranes.

Enjoy the speed of Flintlastic SA in temperatures as low as 35°F (2°C).

Flintlastic® SA self-adhered membranes deliver an excellent bond when ambient temperatures are 50°F and rising. Arctic Edge is a revolutionary, use-only-as-needed, auxiliary tape engineered to significantly boost Flintlastic SA adhesion in temperatures as low as 35°F.

Cold morning? Don't delay the project. Kick your crews off with Arctic Edge and stop tape use as soon as ambient temperatures reach 50°F (10°C).

December project? Be prepared to complete the job with Arctic Edge. If you end up with an unseasonably warm day, save it for next time.

PRODUCT ADVANTAGES

- Enjoy the speed and safety of Flintlastic SA year round
- Use only as needed: keep production moving on cold mornings
- No change to standard Flintlastic SA membranes
- No more waiting for metal primer to cure in cold temperatures
- Covered under standard Integrity Roof System (NDL) Limited Warranties, up to 25 years

Use the same trusted Flintlastic SA membranes all year long, adding Arctic Edge in critical waterproofing details when needed:

Roof Perimeter

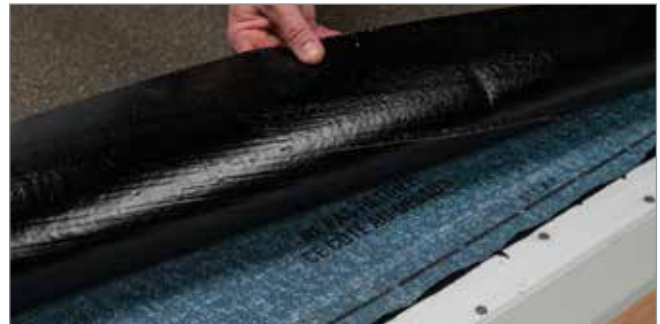

Self-Adhered Side Laps

Base/Ply End Laps

Metal Primer Replacement

NOTE: In cold weather, a hot air welder is required for granulated surface overlaps such as cap sheet endlaps.

Contact your local CertainTeed Territory Manager for a complimentary sample!

4" X 260' PER ROLL

Approximately enough tape to adhere four rolls of Flintlastic SA PlyBase or eight rolls of Flintlastic SA MidPly, SA Cap, SA Cap FR.
