Section 1: Product and Company Identification

Product Group: ProRoc® Finishing Products, Powdered Aggregated Textures
Product Use: Drywall Texture Finishing
Manufacturer: CertainTeed Gypsum, Inc.
4300 W. Cypress St., Suite 500
Tampa, FL 33607 USA
Web Site: www.certainteed.com

CertainTeed Gypsum Canada, Inc.
2424 Lakeshore Road West,
Mississauga, Ontario, Canada
L5J 1K4
Web Site: www.certainteed.com

Phone Number: Professional: 800-233-8990
Consumer: 800-782-8777

Product Names: ProRoc® Wall and Ceiling Texture (Red)
ProRoc® Wall and Ceiling Texture (Blue)
ProRoc® Wall and Ceiling Texture (Green)

24-hour Emergency Number: In case of an emergency call
Team-1 Environmental Services Inc.
1-800-32 SPILL; 1-800-327-7455 (24 hrs)

Section 2: Hazards Identification

<table>
<thead>
<tr>
<th>NFPA (USA)</th>
<th>WHMIS (Canada)</th>

</table>

Emergency Overview: CertainTeed Finishing Products, Powdered Aggregated Textures do not present an inhalation, ingestion, or contact health hazard unless subjected to operations such as sanding or machining which result in the generation of airborne particulate.

When water is added to product, heat will be generated; heat may be sufficient to cause burns.

Appearance, Colour and Odour: Powder, white to light grey, odourless.

USA: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Canada: This product is a controlled product under WHMIS.
Section 2: Hazards Identification, continued

Potential Health Effects: ACUTE (short term): see Section 8 for exposure controls

Relevant Route(s) of Exposure:

Inhalation: High concentrations of dust from sanding or machining, may cause coughing and mild, temporary irritation following a short-term exposure. Long-term inhalation exposure to crystalline silica can have potentially serious respiratory effects (see Chronic health effects below).

Ingestion: Avoid ingesting this product. Ingestion may cause gastrointestinal problems.

Skin: Prolonged or repeated contact may cause irritation. When water is added to product, heat will be generated; heat may be sufficient to cause burns.

Eye: Direct contact with the eyes may cause temporary irritation as a foreign object in the eye.

CHRONIC (long term): see Section 11 for additional toxicological data

Prolonged or repeated exposure to fine airborne crystalline silica dust may cause severe scarring of the lungs, a disease called silicosis. The risk of developing and the severity of silicosis depends on the airborne concentration of respirable-size silica dust to which an employee is exposed and the duration of exposure. Silicosis usually develops gradually over 20 years or more of exposure. Particles with diameters less than 1 micrometer are considered most hazardous. The amount of respirable silica generated from sanding operations will vary.

The early symptoms of silicosis are cough, mucous production and shortness of breath upon exertion. Silicosis may continue to develop even after exposure to crystalline silica has stopped.

The International Agency for Research on Cancer (IARC) has concluded that crystalline silica in the form of quartz from occupational sources should be classified as carcinogenic to humans (Group 1).

Medical Conditions Aggravated by Exposure: Skin contact may aggravate an existing dermatitis.

Interactions With Other Chemicals: Tobacco smoking in combination with long-term high dust exposures may increase both smoking and dust-related pulmonary health problems. Simultaneous exposure to known carcinogens can increase the carcinogenicity of crystalline silica.

Potential Environmental Effects: No adverse effects known.

Section 3: Composition / Information on Ingredients

Hazardous Ingredients:

** Total Crystalline silica, as quartz.

Note: See Section 8 of this MSDS for exposure limit data for these ingredients.
Section 4: First Aid Measures

Inhalation: If high airborne concentrations are present, take proper precautions to ensure your own safety before attempting rescue (e.g. wear appropriate protective equipment). If symptoms develop, remove source of contamination or move victim to fresh air. Obtain medical advice.

Eye Contact: Do not allow victim to rub eyes. Let the eyes water naturally for a few minutes. Have victim look right and left, and then up and down. If particle/dust does not dislodge, flush with lukewarm, gently flowing water for 15 minutes or until particle/dust is removed, while holding the eyelids open. If irritation persists, immediately obtain medical attention. DO NOT attempt to manually remove anything stuck to the eye. Obtain medical advice.

Skin Contact: No health effects expected. If irritation does occur, flush with lukewarm, gently flowing water for 5 minutes. If irritation persists, obtain medical advice.

Ingestion: If irritation or discomfort occurs, obtain medical attention immediately.

Notes to Physician: Jurisdictions which have specific regulations for crystalline silica also require medical surveillance programs. Medical surveillance programs may include periodic physical examinations, chest X-rays and pulmonary function tests. Since there may be some variation in these requirements, specific information should be sought from the appropriate government agency in each jurisdiction.

Section 5: Fire Fighting Measures

Flammable Properties: Product is non-flammable.

Suitable extinguishing Media: Use water or other extinguishing media appropriate for the surrounding fire.

Unsuitable extinguishing Media: Not available

Explosion Data:
- Sensitivity to Mechanical Impact: Not sensitive
- Sensitivity to Static Discharge: Not sensitive

Specific Hazards arising from the Chemical: Calcium carbonate may decompose into corrosive calcium oxide and carbon dioxide at about 825°C (1517°F). During a fire, irritating and toxic gases may be generated.

Protective Equipment and precautions for firefighters: As for any fire, evacuate the area and fight the fire from a safe distance. Wear a pressure-demand, self-contained breathing apparatus and full protective gear. Fight fire from a protected location or a safe distance.

NFPA
- Health: 1
- Flammability: 0
- Instability: 0

Section 6: Accidental Release Measures

Personal Precautions: Wear proper personal protective equipment as indicated in Section 8.

Environmental Precautions: Prevent material from contaminating soil and from entering sewers or waterways.

Methods for Containment: No special methods required.

Methods for Clean-up: Scoop or shovel spilled material into an appropriate waste container for disposal. Collect all spilled material for proper disposal. Dispose in accordance with federal, state and local regulations.

Other Information: Not available
Section 7: Handling and Storage

Handling: Avoid creating and breathing dust from this product. Wet sand when possible. Avoid contact with eyes, skin and clothing. Minimize dust generation and accumulation. Wear protective glasses and gloves. If exposure limits are exceeded wear appropriate respiratory protection. (See Section 8)

Section 8: Exposure Controls/Personal Protection

Exposure Controls

Other Exposure Guidelines: For Kaolin Clay: NIOSH REL 10 mg/m³ (total dust); 5 mg/m³ (respirable dust)

Engineering Controls: General ventilation is adequate for application of product in its original form. During sanding operations, monitor dust concentrations in air and provide local exhaust ventilation when any exposure guideline is exceeded.

Personal Protection:

Eye/Face Protection: Wear safety glasses or goggles. During sanding operations wear protective goggles.

Skin Protection: Wear protective gloves when necessary to prevent irritation to the skin.

Respiratory Protection: During sanding operations and when dust concentrations in air exceed the occupational exposure guidelines, always take the following precautions:
- Wear a NIOSH approved dust mask.
- Maintain adequate ventilation and air circulation.
- Warn others in the area.
- Use a NIOSH approved respirator when dust levels exceed any of the exposure guidelines listed in the table above.
Section 8: Exposure Controls/Personal Protection, continued

NIOSH recommendations for Crystalline silica (respirable dust); concentrations in air:
UP TO 0.5 mg/m³: Air-purifying respirator with high-efficiency particulate filter(s).
UP TO 1.25 mg/m³: Powered air-purifying respirator with high-efficiency particulate filter; or SAR
operated in a continuous-flow mode.
UP TO 2.5 mg/m³: Full-facepiece air-purifying respirator with high-efficiency particulate filter(s); or
powered air-purifying respirator with tight-fitting facepiece and high-efficiency particulate filter.
UP TO 25 mg/m³: Positive pressure SAR.

A respiratory protection program that meets OSHA’s 29 CFR 1910.134 and ANSI Z88.2
requirements or Canadian Standards Association (CSA) Standard Z94.4-93 must be followed
whenever workplace conditions warrant a respirator’s use.

Other Protective Equipment: Not applicable

General Hygiene Measures: Launder contaminated clothing before re-wearing, or discard. Do not eat, drink or smoke in work
areas. Wash hands thoroughly after handling this material. Maintain good housekeeping.

Section 10: Stability and Reactivity

Chemical Stability: Stable. When water is added to product, heat will be generated.

Conditions to Avoid: Not available

Incompatible Materials: Strong acids, Aluminum and Ammonium salts. May react with strong acids to liberate carbon
dioxide.

Hazardous Decomposition Products: Calcium oxide may form if product is exposed to extreme heat 825°C (1517°F).

Possibility of Hazardous Reactions: None known

ACGIH: (American Conference of Governmental Industrial Hygienists)
- A2: Suspected human carcinogen
- A4: Not classifiable as a human carcinogen
IARC: (International Agency for Research on Cancer)
- Group 1: The agent is carcinogenic to humans
- Group 2B: The agent is possibly carcinogenic to humans
NTP: (National Toxicology Program)
- Known – Known to be a human carcinogen

Irritation: Inhaling high concentrations of dust may cause coughing and mild, temporary irritation. Irritating to the eyes as a foreign object. May be irritating to the skin.

Corrosivity: Not applicable

Sensitization: Not applicable

Neurological Effects: Not applicable

Genetic Effects: Not applicable

Reproductive Effects: Not applicable

Developmental Effects: Not applicable

Other Adverse Effects: Not applicable

Target Organ Effects: Lungs and eyes.
Section 12: Ecological Information

Ecotoxicity: Not applicable
Persistence/Degradability: Not available
Bioaccumulation/Accumulation: Not applicable
Mobility: Not available

Section 13: Disposal Considerations

Waste Disposal Method: Do NOT dump into any sewers, on the ground or into any body of water. Store material for disposal as indicated in Section 7 Handling and Storage.

United States: Dispose of in accordance with local, state and federal laws and regulations.
RCRA Waste Codes: Not applicable

Canada: Dispose of in accordance with local, provincial and federal laws and regulations.

Section 14: Transport Information:

Canadian Transportation of Dangerous Goods (TDG): Not regulated for transportation

ADR/RID: Not regulated for transportation

IMDG: Not regulated for transportation

Marine Pollutants: Not applicable

ICAO/IATA: Not regulated for transportation

Section 15: Regulatory Information

USA

TSCA Status: All ingredients in the product are listed on the TSCA inventory.

SARA Title III
Sec. 302/304: None
Sec. 311/312: Chronic
Sec. 313: None
CERCLA RQ: None

California Prop 65: This product may contain a substance known to the State of California to cause cancer [Crystalline silica – airborne particles of respirable size].

Canada

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

WHMIS Classification: D2A – Material Causing Other Toxic Effects– Due to possibility of inhaling Crystalline silica during sanding operations.

New Substance Notification Regulations: All substances in this product are listed on Canada’s Domestic Substances List (DSL).

National Pollutant Release Inventory: There are no NRPI reportable substances in this product.
