SUBTLE AND CALM

If your home’s exterior has a lot of design elements, closely related colors will unify and simplify its appearance. A monochromatic approach – based on different shades of the same color – will have a similar effect. The color palette can be either cool (sterling gray walls, oxford blue gables, pacific blue trim) or warm (buckskin walls with savannah wicker trim); the idea is to limit contrast for a relaxed vibe. Mixing cool and warm colors with similar intensity also works well.
An example of a low-contrast combination with trim in color: Cedar Impressions Double 7” Staggered Perfection Shingles in suede with Vinyl Carpentry window trim and Restoration Millwork custom-painted trim in mountain cedar.
